Will not harm plumbing, trees or shrubs when used as directed.

SEWER CARTRIDGE

MQ

Contains 6 Cartridges

MQ Sewer Cartridges are for use in sewer lines leading to city sewer lines or to cesspools. They are not intended for use in kitchen sink or bathtub drain. Do not permit sewage to back up into basement before using MQ Sewer Cartridge, and then expect them to do a sewer cleaning job, they wont. For successful operation they depend upon a sufficient flow of water to carry them to the obstruction in the sewer line, where they are stopped by the wire hooks and where the cartridge disintegrates from moisture. To do their work, sufficient time must be allowed for the water to drain away, even though slowly, leaving the cartridge at the point of trouble.

This Device, if used according to instructions, will chemically dissolve all organic obstructions in sewers, but must be used BEFORE the sewer is completely plugged.

KILLS
Roots and Dissolves Grease
and Other Organic Material
in Sewer Pipes

NO MUSS—NO BOTHER—NO DIGGING

MQ Sewer Cartridge

Will not harm
Septic Tanks, Cesspools or Drain Pipes

INSTRUCTIONS — READ BEFORE USING

1. Remove cartridge from polyethylene bag.
2. Bend wires slightly away from cartridge.
3. Drop in toilet or basement cleanout opening and flush toilet. Do not flush toilet again for 6 to 8 hours for most effectiveness.
4. If cartridge fails to pass toilet trap, do not try to remove it as it is dangerous to handle when wet and will dissolve by morning. Then put another cartridge into sewer thru basement cleanout and flush toilet.
5. Recommended use is one cartridge a month to keep sewer running freely. If sewer is sluggish use one cartridge per day until good flow is reestablished then one per month.
6. If your sewer is completely plugged, call your plumber.
