GUARDALL

M-10 ALGAEICIDE

MADE IN U.S.A.

FOR SWIMMING POOL MAINTENANCE
EPA REG. NO. 103059
EPA EST. NO. 103059
EPA REG. NO. 103059

CONTAINS APPROXIMATELY 6 OZ.

This product is effective for control of algae and algal slime in swimming pools. **GUARDALL M-10 ALGAEICIDE** is effective in all types of water, is readily soluble and spreads rapidly throughout the pool.

This algicide is compatible with all chemicals normally used in swimming pool maintenance; however, in its concentrated form this chemical should not come in contact with high concentrations of chlorine. **DO NOT MIX ALGAEICIDE AND CHLORINE TOGETHER WHEN ADDING TO THE POOL.**

DIRECTIONS

For initial application or when pool water is changed, use one quart per 5,000 gallons of water.

For maintenance, use four ounces per week per 5,000 gallons of water every third to seventh day depending on weather and use factors. After each rain of consequence, a maintenance dose should be added to the pool.

If visible algae growth is noted, water should be treated by adding 1 quart of Algaecide per 2,000 gallons of water. The next day remove filtered algae by vacuuming and add 1 quart per 5000 gallons of water.

Algaecide may be added by pouring the contents of the 1 gallon container or swimming activity will help disperse the algicide. More rapid dispersion may be achieved by pouring a little of the correct amount into several areas of the pool.

To sanitize walls, runways, ladder areas and other areas surrounding swimming pool, use a solution of one ounce of Algaecide M-10 to one gallon of water. Pre-clean the surfaces prior to application of the sanitizing solution. Apply the sanitizing solution in a continuous manner to thoroughly sanitize surfaces.

CAUTION

Keep out of reach of children. Contents should not be used for any purpose other than swimming pool maintenance. Do not use in hot tubs, whirlpools, or spas. Do not use in swimming pools used for drinking water.

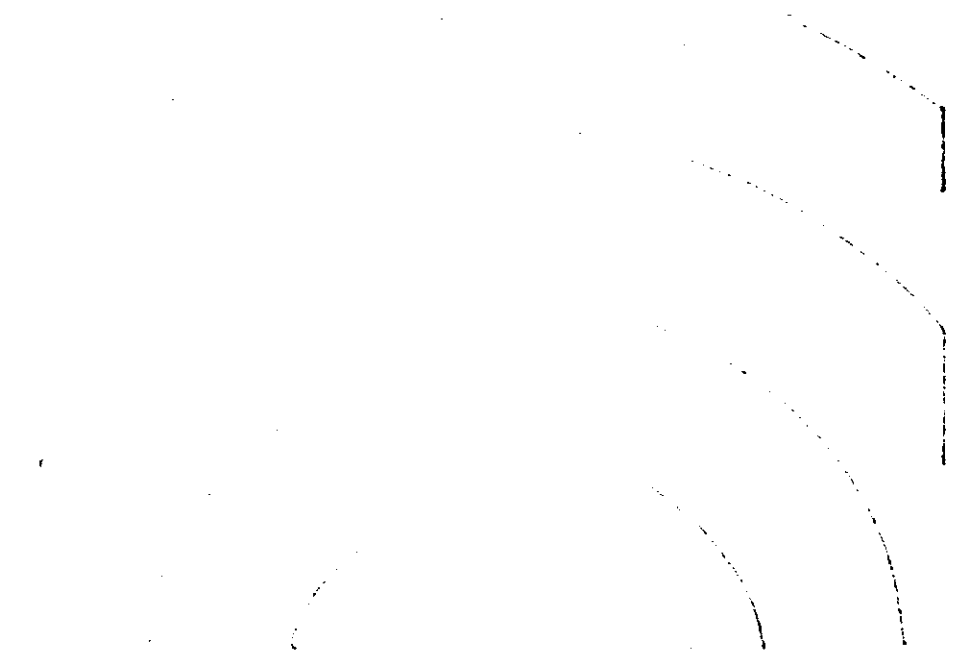

Do not use in swimming pools used for drinking water. Do not use in swimming pools used for drinking water. Do not use in swimming pools used for drinking water.

Do not use in swimming pools used for drinking water. Do not use in swimming pools used for drinking water.

INSTRUCTIONS FOR USE

Algae and algal blooms may be effectively controlled with one gallon of Algacide AZ-30 per 20,000 gallons of water. This is an initial treatment after the usual cleaning operation. For routine treatment, use one quart of Algacide AZ-30 for each 20,000 gallons of water every four days. In hot weather, this frequency should be increased to every two days.

For control of algae in a pond or lake, use one gallon of Algacide AZ-30 per 20,000 gallons of water. This is an initial treatment after the usual cleaning operation. For routine treatment, use one quart of Algacide AZ-30 for each 20,000 gallons of water every four days. In hot weather, this frequency should be increased to every two days. One gallon of Algacide AZ-30 is about 7 1/2 gallons.

For control of algae in a stream or river, use one gallon of Algacide AZ-30 per 20,000 gallons of water. This is an initial treatment after the usual cleaning operation. For routine treatment, use one quart of Algacide AZ-30 for each 20,000 gallons of water every four days. In hot weather, this frequency should be increased to every two days.

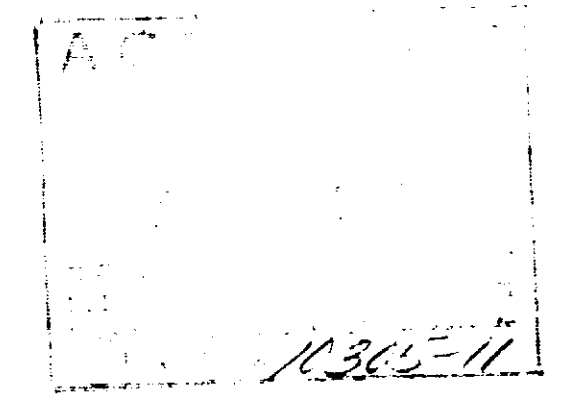

GENERAL INFORMATION

Algacide AZ-30 is a water-soluble algicide which controls algae in ponds, lakes, streams, and rivers. It is effective against all types of algae, including green, blue-green, and diatoms. Algacide AZ-30 is safe for fish and other aquatic life. It is also safe for plants and animals. Algacide AZ-30 is a non-toxic, non-flammable, and non-corrosive liquid. It is easy to use and does not require special equipment. Algacide AZ-30 is available in 1-gallon and 5-gallon containers.
