DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

For formulation into end-use cockroach baits intended only for indoor food and non-food use areas.

Use Sumithion 20 MC as the active ingredient for formulating cockroach baits. Sumithion 20 MC is added to suitable baits to give 5% by weight of total formulation. The treated bait is then dispensed into bait stations at 0.5 oz per station or similar weight, or is applied to substrates frequented by cockroaches. The bait stations are then sealed.

Since Sumithion 20 MC is intended for sale to formulators of different brands of cockroach baits, as well as to pest control operators who formulate their own baits, precise instructions for formulation are not possible. Formulators and pest control operators are responsible for registering their own baits containing Sumithion 20 MC, and for following all relevant regulations for their sale, use, storage and disposal.
