SUBJECT:SumiOne Technical Grade (EPA Reg. No. 10308-30)Fast track amendment of label to comply with PR 2007-4

Dear EPA Staff,

The label for SumiOne Technical Grade (EPA Reg. No. 10308-30, henceforth 'SumiOne') has been revised to comply with PR Notice 2007-4. SumiOne is not soluble in water, therefore empty containers must be rinsed with solvent to remove any residues. A statement to this effect has been inserted under 'Container Disposal'. According to PR 2007-4, such revisions must be made by amendment rather than notification. We have also revised the 'Container Disposal' statement to include the standard text required by 2007-4. This change is <u>underlined</u>, *italicized* and **bolded** for <u>clarity</u>.

As the technical advisor for Sumitomo Chemical Company Limited, I hereby certify that no changes, other than those noted above, have been made to the SumiOne label.

In support of this application for an amendment, we attach the following documents:

- 1. 1 revised SumiOne label with changes underlined, italicized and bolded
- 2. 5 copies of the 'clean' revised SumiOne label
- 3. 1 copy of current EPA-approved SumiOne lalel
- 4. EPA form 8570-1 completed for amendment of this label.

We understand that, since this label amendment is at EPA's request, no PRIA fees will be due. We would appreciate having this amendment request given fast-track review.
