INDUSTRIAL 40-K WEED KILLER.

ACTIVE INGREDIENTS:

- 5 - (3,4- dichlorophenyl)-1,
- 1- dimethylurea 4%
- Calcium-Clay 96%

BEST DOCUMENT AVAILABLE

157868

PRINCIPAL USES:

INDUSTRIAL 40-K is a highly effective, persistent non-selective type general herbicide for extended control of a very wide range of weeds and grasses. It is recommended for non-cropland areas such as industrial sites; around buildings, tanks and other storage facilities, along fences and wherever grasses and weeds might interfere with the drainage, create a fire hazard, or provide unsightly appearance.

GENERAL DESCRIPTION:

INDUSTRIAL 40-K is substantially dust-free, free flowing, granular material. It is non-corrosive, non-volatile, non-flammable and easy to use.

PRECAUTIONS:

INDUSTRIAL 40-K is an extremely potent, non selective herbicide; it should not be used on croplands, lawns, or near valuable woody or herbaceous plants. Special care should be taken against applying Industrial 40-K in the root area of shade trees or desirable shrubs and where drainage from treated area might contact their roots.

APPLICATION & DOSAGE:

INDUSTRIAL 40-K should be used as furnished in dry form, obtaining uniform distribution over the area to be treated. Apply one or two pounds per hundred square feet with a cyclone type seeder for the maximum results. After treatment, wash seeder thoroughly before using it for fertilizer.

Notes To Buyer

Seller makes no warranty of any kind, express or implied, concerning the use of this product. Buyer assumes all risk of use or handling whether in accordance with directions or not.
