

HOW TO USE ALGAESIL

TO KILL ALGAE in infested pools.

1. Back wash filter.
2. Keep the circulating system on for the entire treatment.
3. Adjust pH to 7.2.
4. Prepare the pool water for the use of ALGAESIL by adding Sodium or Calcium hypochlorite. Allow about 10 minutes for distribution.
5. For best dispersion, add ALGAESIL beneath the surface of the water over a return line from the filter. A temporary color may appear which will shortly turn to sparkling blue.
6. The amounts required for Sodium or Calcium hypochlorite and ALGAESIL are shown in Table A, along with the amounts needed with Sodium, Potassium dichloroisocyanurate and Trichloroisocyanurate. Maintain residual chlorine concentrations at 6.6 to 10 ppm as determined by chlorine test kit.

TABLE A

Pool Water	15 Sodium hypochlorite or	70 Calcium hypochlorite	60 Sodium or Potassium dichloroisocyanurate	85 Trichloroisocyanurate	ALGAESIL
5,000 gal.	1/2 lb.	1/4 lb.	1/2 lb.	1/2 lb.	1/2 oz.
10,000 gal.	1 lb.	1/2 lb.	1 lb.	1 lb.	1 oz.
20,000 gal.	2 lb.	1 lb.	2 lb.	2 lb.	2 oz.

7. Within one week after treatment, brush surfaces to remove dead algae, and if necessary, repeat treatment.

ALGAESIL is also effective against algae in pools treated with chlorine.

For more information on the use of ALGAESIL, see paragraphs 2, 3, 4 and 5 above.

8. For best results, use Sodium or Calcium hypochlorite and ALGAESIL in the following proportions: 1 lb. of Sodium hypochlorite to 1 oz. of ALGAESIL, or 1 lb. of Calcium hypochlorite to 1 oz. of ALGAESIL.

TABLE B

Pool Water	15 Sodium hypochlorite or	70 Calcium hypochlorite	60 Sodium or Potassium dichloroisocyanurate	85 Trichloroisocyanurate	ALGAESIL
5,000 gal.	1/2 lb.	1/4 lb.	1/2 lb.	1/2 lb.	1/2 oz.
10,000 gal.	1 lb.	1/2 lb.	1 lb.	1 lb.	1 oz.
20,000 gal.	2 lb.	1 lb.	2 lb.	2 lb.	2 oz.

9. For best results, use Sodium or Calcium hypochlorite and ALGAESIL in the following proportions: 1 lb. of Sodium hypochlorite to 1 oz. of ALGAESIL, or 1 lb. of Calcium hypochlorite to 1 oz. of ALGAESIL.

TO WINTERIZE POOL and prevent Algae, Fungus and Algal Slime

ALGAESIL is a powerful algicide which kills algae, fungus and algal slime. It is also a powerful disinfectant which kills bacteria and viruses.

ALGAESIL is also a powerful algicide which kills algae, fungus and algal slime. It is also a powerful disinfectant which kills bacteria and viruses.

MAQUAT LC-12S - 10% is:
Economical - Efficient - Stable

MAQUAT LC-12S - 10% is compatible with all swimming pool chemicals and is non-injurious to metal, paint, plastic, and tile.

MAQUAT LC-12S - 10% when used as directed, will improve the appearance and cleanliness of the pool.

MAQUAT LC-12S - 10% prevents unsightly growths of algae.

MAQUAT LC-12S - 10% may be stored for prolonged periods of time without losing its effectiveness or strength.

MAQUAT LC-12S - 10% requires no special equipment for treating water. May be added directly to the pool in any spot or added to the water circulation equipment.

MAQUAT LC-12S

E. P. A. Reg. No. 10324 - 2
Concentrated Algaecide

MAQUAT LC-12S - 10% for Control of Algae
Growth in Swimming Pools

ACTIVE INGREDIENT:

n-Alkyl (61% C₁₂, 23% C₁₄, 11% C₁₆, & 5% C₁₈)
dimethyl benzyl ammonium chloride

INERT INGREDIENT:

Water

DANGER

Keep Out Of Reach Of Children

Causes severe eye and skin damage. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and gloves when handling. Harmful or fatal if swallowed. Contamination of food.

DANGER

This product is toxic to fish. Do not discharge into lakes, streams or ponds.

FIRST AID

In case of contact, immediately flush eyes or skin with water for at least 15 minutes. For eyes, Remove and wash contaminated clothing before re-entire. If swallowed, drink promptly a large quantity of water or milk, or if these are not available, drink water. Avoid alcohol. Call a physician.

NOTE TO PHYSICIAN:

Probable mucosal damage may contraindicate gastric lavage. Measures against circulatory shock and depression and convulsion may be needed.

Do not reuse empty container - When empty, re-
