

SUPER ALGAEICIDE N F

Is compatible with those chemicals normally used in pool water and will not damage tile, concrete, metal or plastics. Keeps pool water free and sparkling, clear of visible algae slime and green brown colors. Improves filter operation and cuts down need for other chemicals. Imparts tone and a pleasant "feel" to swimming pool water.

COMPOSITION

Active Ingredients.

Poly(oxyethylene (dimethyliminio)ethylene(dimethyliminio)-ethylene dichloride)	60.0 percent
Inert Ingredient	40.0 percent

NET CONTENTS 32 FL. OZ. (1 QT.)

APPLICATIONS

SUPER ALGAEICIDE NF is used to control the growth of algae in swimming pools. For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using SUPER ALGAEICIDE NF.

For pools having just visible algae growth add an initial dose of 11 to 77 fl. oz. of SUPER ALGAEICIDE NF per 10,000 gal. of water and remove settled algae debris by cleaning.

For treatment of a freshly cleaned and filled pool, add initially 6 to 11 fl. oz. of SUPER ALGAEICIDE NF per 10,000 gal. of water.

To maintain pools free of visible algae growth, subsequent additions of 2 to 4 fl. oz. of SUPER ALGAEICIDE NF per 10,000 gal. of water should be made every 5 to 7 days after the initial treatment. Uniform distribution of SUPER ALGAEICIDE NF throughout the water in the pool is necessary for maximum effectiveness.

SUPER ALGAEICIDE NF is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. SUPER ALGAEICIDE NF can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix SUPER ALGAEICIDE NF with concentrated dry or liquid chlorine products.

CAUTION

KEEP OUT OF THE REACH OF CHILDREN

Harmful if swallowed. Do not get in eyes. Avoid contact with skin. In case of contact flush with plenty of water for at least 15 minutes. If eye irritation persists get medical attention. Avoid contamination of food.

Rinse empty container thoroughly with water and discard container. Do not reuse empty container. Destroy it by perforating or crushing. Bury or discard in a safe place away from water supplies. This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Apply this product only as specified on this label.

HOW TO CALCULATE THE NUMBER OF GALLONS IN YOUR POOL

Measure length, width and average depth in feet. For square or rectangular pools.

$$\text{Gallons} = \text{length} \times \text{width} \times \text{depth} \times 7.5$$

For circular or elliptical pools

$$\text{Gallons} = \text{length} \times \text{width} \times \text{depth} \times 5.9$$
