SPRAY APPLICATION

FAIR PLUS is a systemic herbicide for the control of tobacco suckers and other weeds. It is applied as a spray to the foliage of the tobacco plants. The active ingredient is the potassium salt of 1,2-dihydro-3,6-pyridazinedione. It is a systemic herbicide which is absorbed by the tobacco plants and moves to the growing points of the suckers. It is effective against tobacco suckers, wild tobacco, and other weeds. It is also effective against tobacco plants which are infested with tobacco beetles and other insects. It is a selective herbicide which does not harm the tobacco plants. It is applied as a spray to the foliage of the tobacco plants. The active ingredient is the potassium salt of 1,2-dihydro-3,6-pyridazinedione. It is a systemic herbicide which is absorbed by the tobacco plants and moves to the growing points of the suckers. It is effective against tobacco suckers, wild tobacco, and other weeds. It is also effective against tobacco plants which are infested with tobacco beetles and other insects. It is a selective herbicide which does not harm the tobacco plants.
