See back panel for additional precautionary statements

12/11/95

**ACCEPTED**

**APR 18 1996**

Under the Federal Insecticide,  
Fungicide, and Rodenticide Act,  
as amended, for the pesticide  
registered under  
EPA Reg. No. 10350-12

**PRECAUTIONARY STATEMENTS:**  
**CAUTION**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS:**

May be harmful if swallowed. Avoid breathing spray mist. Avoid contact with eyes, skin or clothing. Wash thoroughly after handling. Avoid contamination of feed and food utensils. **DO NOT SPRAY DIRECTLY ON HUMANS OR PETS.** NOTE: Kittens and puppies less than 12 weeks old may be sensitive to insecticide. Avoid treating bedding or other key rest areas where they may have prolonged direct contact with product. Keep children and pets out of treated areas until spray has dried.

**STATEMENT OF PRACTICAL TREATMENT:**

**If swallowed:** Call a physician or Poison Control Center. Drink 1 or 2 glasses of water and induce vomiting by touching finger to back of throat. Never give anything by mouth to an unconscious person.

**If on skin:** Remove contaminated clothing and wash skin with soap and water.

**If in eyes:** Flush eyes with plenty of water. If irritation persists, call physician.

Note to Physician: Chlorpyrifos is a cholinesterase inhibitor, treat symptomatically. Atropine, only by injection, is an antidote.

**ENVIRONMENTAL HAZARDS:** This product is toxic to fish, wildlife, and birds. Do not apply directly to water. Do not contaminate lakes or streams by cleaning of equipment or disposal of wastes. Do not contaminate water when disposing of equipment wash waters. Do not use on azaleas, camellias, poinsettias, roses, and variegated ivy because of possible injury to these plants.

**STORAGE AND DISPOSAL:**

Do not contaminate water, food, or feed by storage or disposal.

Storage: Store in original container out of the reach of children. Do not freeze or store above 120° F.

- Unused Pesticide Disposal: Wastes resulting from use of this product may be disposed of on site or at an approved waste disposal facility.

Empty Container Disposal: Do not reuse container. Triple rinse, then wrap original container in several layers of newspaper and discard in trash or dispose of in sanitary landfill.

**DURATROL™ YARD SPRAY CONCENTRATE** is a concentrate formulation containing microencapsulated Dursban® insecticide for residual control of fleas and ticks in lawn and kennel areas including concrete surfaces. Duratrol Yard Spray Concentrate aides in the control of deer ticks. The microcapsules provide a "timed release" mechanism for up to 4-weeks control of fleas on turf, even when it rains. It also kills many other yard and kennel insects. (See Directions for Use.) Use a product registered by EPA for use on pets to control the source of your flea infestation. For a total flea control program, ask your veterinarian about Duratrol Plus Household Flea Spray and Sectrol™ Plus Pet Spray and Flea Foam. [For a complete flea control program, or for particularly heavy flea infestation, use (product name) in conjunction with other (product names) products (Dog Spray, Fogger, Carpet and Room Spray.)] [For a total flea and tick control program, treat your pet, protect your pet and treat your home with (System) Shampoo, Repellent, Home Spray and Fogger (flea control products)].

**DIRECTIONS FOR USE:**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**IN YARDS:**

To control fleas, ticks, including ticks that carry Lyme disease and other insects such as ants, chiggers, cockroaches, crickets, cutworms, grasshoppers, mosquitoes, sow bugs, and spiders: Use 2 fl. oz. (4 Tbsp.) of concentrate in 1 gallon of water for every 160 sq. ft. of area to be treated. (Use) This bottle (30 fl. oz.), diluted in 15 gals. of water, treats up to 2400 sq. ft. Use a garden hose sprayer adjusted to a coarse, low-pressure spray. Apply uniformly, using a smooth back-and-forth motion. Spray directly on insects where possible. Repeat treatment as necessary to maintain effectiveness.

**FOR KENNELS AND DOG HOUSES:**

Mix 20 fl. oz. of concentrate and water to make 1 gal. of spray. Apply evenly, but not to runoff, to buildings, resting areas, and floors. Replace pet bedding. Do not apply directly to pets or pet bedding.

**TO CONTROL FIRE ANTS:**

Mix 8 fl. oz. of concentrate and water to make 1 gal. in a sprinkler can. Stir occasionally during use to keep product mixed properly. Thoroughly wet mound and surrounding area to a 4 ft. diameter. Apply during cool weather, 65° - 80° F., or in early morning or late evening. Apply to new mounds as they appear and do not disturb mounds prior to treatment. If possible, treat all mounds in the vicinity and treat all colonies which may not as yet have constructed a mound.

**Outdoor Insects Controlled**

Ants	Flies
Bees	Grasshoppers
Beetles	Hornets
Carpenter ants	Millipedes
Chiggers	Scorpions (see How To Use)
Clover mites	Silverfish
Cockroaches	Sowbugs
Crickets	Spiders
Cutworms	Ticks
Earwigs	Wasps
Fleas	Yellowjackets

**How To Spray**

Shake bottle before and during spraying to keep contents from settling. Apply the spray directly to the target area such as cracks and crevices, along sidewalks or patios, around windows and door frames, or other areas where pests may be present. Do not spray windows as washing will be required due to water residue.

**When To Treat**

Use whenever insects are active and a problem, or to prevent house infestations. Control may require one week. Repeat applications every 30 to 90 days.

**How To Use**

Use as either a perimeter treatment or as a localized spray to control listed insects.

**PERIMETER TREATMENTS** help prevent infestations of building. When making perimeter treatments, apply this product where pests are active or may find an entrance. For example, treat a band of soil 6 to 10 feet wide around and adjacent to buildings and treat the building foundation to a height of 2 to 3 feet. Thoroughly and uniformly wet the band area, using a smooth back-and-forth motion.

**LOCALIZED SPRAYS** provide control of insect pests on outside surfaces of buildings and other outdoor areas where pests congregate. (For localized spray) Treat by applying the spray directly to the target area such as cracks and crevices, along sidewalks or patios, around (not on) windows and door frames, or other areas where pests may be present.

**SCORPIONS:** Remove accumulations of lumber, firewood, and other materials which serve as hiding areas. Before stacking firewood or lumber, apply product to surfaces immediately below such materials. Perimeter treatments may also be helpful in reducing pests immigrating from surrounding areas.

SHAKE WELL BEFORE USE AND FREQUENTLY DURING USE!

**How to use the hose end sprayer with DURATROL YARD SPRAY CONCENTRATE:**

With average water pressure (30-45 psi), the bottle should be empty in about 8-10 minutes. The rate of the bottle emptying is directly related to the water pressure. To obtain best results, do not exceed the recommended coverage area of 2400 square feet.

**HOW TO USE THIS SPRAYER**

1. Before you start, the (product control) blue (white) knob should be pointed away from the triangle on the spray head. If it cannot be turned, push it out from the back. The (water control) red knob should be in the OFF position (fig 1).
2. Shake the container well and attach it to your garden hose.
3. Turn on the water from the faucet.
4. When you are ready to spray, turn the blue (white) knob so that it points at the triangle on the spray head and push it in (fig 2).
5. Turn the red knob one-quarter turn and begin spraying (fig 2).
6. When you are finished spraying or if you have to stop spraying at any time, turn the red knob back to the OFF position (fig 3).
7. Push the blue (white) knob out from the back and turn it. This seals the container (fig 3).
8. Turn off the water from the faucet.
9. Turn the red knob ON then OFF, to drain the water from the hose.
10. Unhook the container (Detach the sprayer) from the hose and (dispose of according to label directions) store it carefully or throw it away.]

SHAKE WELL BEFORE USING!

68

[Easy to use:

1. Make sure the ON/OFF Water Control Knob is in the OFF position.
2. Shake well before applying.
3. Connect spray nozzle to hose with convenient swivel end.
4. Turn the red knob on the Product Control Button to align with the white tab, then push the button in all the way. Avoid squeezing bottle after this, as contents may spray through nozzle opening.
- (4. Push the Product Control Button in all the way. Avoid squeezing bottle after this, as contents may spray through nozzle opening.)
5. Turn water on at faucet.
6. When ready to spray, point nozzle toward lawn, then turn Water Control Knob to ON position.
7. When finished, push (red) Product Control Button to OFF position to stop product flow. Turn Water Control Knob to OFF and turn off faucet. Turn Water Control Knob to ON to release water pressure, then turn OFF again.
8. To prevent accidental discharge when not in use, turn red knob so it is not aligned with white tab and cannot be pushed in. Store out of reach of children.
- (8. Store out of reach of children.)]

[HOSE END SPRAYER INSTRUCTIONS FOR USE:

- (1) Before removing cap, invert bottle and shake for 20 seconds. Thorough mixing is essential to ensure proper performance.
- (2) Screw the Hose End Sprayer onto your hose.
- (3) Remove cap from the bottle. Save the cap.
- (4) Screw the bottle snugly into the sprayer.
- (5) Point sprayer away from you. Turn faucet on to begin spraying.
- (6) To start flow of insecticide, place finger over the hole on the right side of the sprayer.
- (7) Hold sprayer at waist level and slowly sweep the area to be treated. Move at a steady pace. With average water pressure, the bottle should be empty in about five (5) minutes.
- (8) To stop flow of insecticide, remove finger from hole to break sprayer action.
- (9) When finished, unscrew the bottle from sprayer and replace cap on bottle.
- (10) Unscrew sprayer from hose and rinse before storing. Shake bottle well before restarting application.]

1. Make sure water control knob on hose sprayer is in the OFF position.
2. Hold by handle and shake vigorously, turning bottle as you shake.
3. Attach hose to spray nozzle.
4. Bend safety tab down and turn control to "water".
5. Slowly turn on water supply to a moderate rate of flow.
6. Point nozzle toward lawn, turn water control knob to "ON". Product will automatically mix with the water. Slowly sweep the area to be treated. Hold bottle level and move at a steady pace. With average water pressure, the bottle will empty in about five (5) minutes. Treats up to 2,400 square feet.

Important Information:

The ABC's of Flea & Tick Control

- A. Treat Your Pet with (System) Flea & Tick Conditioning Shampoo for Dogs to kill fleas and ticks while conditioning your dog's coat.
- B. Protect Your Pet with (System) Flea & Tick Repellent to keep fleas and ticks from re-infesting your pet. For continuous protection, use the (Product name) Collar.
- C. Treat Your Home with (System) Home Flea & Tick Killer or Home Fogger containing (Product name) an Insect Growth Regulator (IGR). Both are guaranteed to kill fleas and ticks plus protect your home from re-infestation of hatching eggs for 210 days. Treat the yard around your home with (System) Yard & Kennel Spray to kill fleas and ticks outside for up to 4 full weeks.

Be sure to read full directions and precautions on the label of each product you use.]
