SHAKE WELL BEFORE USING!

MEC CHLORPYRIFOS LIVESTOCK PREMISE SPRAY CONCENTRATE is a unique, concentrated microencapsulated formulation for residual control of houseflies, stableflies and other insect pests in and around dairy, beef cattle, swine, sheep, poultry, horse and dog premises.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

SHAKE WELL BEFORE USING AND FREQUENTLY DURING USE.

FOR CONTROL OF HOUSEFLIES AND STABLEFLIES

Also controls cockroaches, spiders, fleas, ticks, ants, earwigs, centipedes and millipedes in animal premises.

PREPARATION: Use a clean compressed-air sprayer or cold-mist fogger. Prepare the amount of spray desired by diluting three (3) fluid ounces of MEC CHLORPYRIFOS LIVESTOCK PREMISE SPRAY CONCENTRATE into one (1) gallon of water.

SHAKE WELL!

APPLICATION INFORMATION:

Adjust the fogger or sprayer nozzle to deliver a coarse, wet spray. Apply to the point of runoff (approximately one (1) gallon of spray per 750 to 1000 square feet of surface).

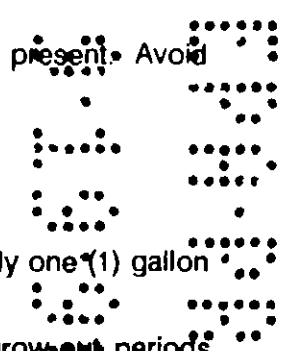

Spray should be applied directly onto walls, ceilings, light fixtures, window frames and other fly resting surfaces. Timing and frequency of application should be based on nuisance levels of flies. The use of any residual fly spray for fly control should be incorporated into a program of general sanitation and manure management to reduce fly breeding sites.

Do not spray directly onto animals, feedstuffs or water. Do not spray while animals are present. Avoid contamination of animals, feedstuffs and water by spray drift.

FOR CONTROL OF DARKLING BEETLE LARVAE (Lesser Mealworm) IN POULTRY HOUSES:

Adjust the sprayer nozzle to deliver a coarse, wet spray. Apply to the point of runoff (approximately one (1) gallon of spray per 750 to 1000 square feet of surface).

Apply MEC CHLORPYRIFOS LIVESTOCK PREMISE SPRAY CONCENTRATE between poultry grow-out periods and when re-infestation becomes apparent. Direct spray onto walls, foam insulation and any other indoor area susceptible to beetle larvae damage. Make sure spray penetrates cracks and crevices. All intermediate, non-penetrable surfaces such as concrete or metal should be treated to provide a barrier to larval migration.

SECOND PANEL (Cont...)

Do not spray in milk storage rooms. Do not contaminate milking or milk handling equipment.

After spraying, rinse sprayer thoroughly with water.

LIMITED WARRANTY: 3M guarantees that the product, if used as directed, will perform as described on this label. 3M makes no other guarantees, warranties or promises for the product. 3M will replace any product found by 3M to be defective.

THE FORGOING WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES EXPRESSED OR IMPLIED, INCLUDING THE WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Except for personal injury, 3M shall not be liable for any damages, including incidental and/or consequential damages, regardless of the legal theory asserted, including negligence and/or strict liability arising out of the use of or the inability to use or the performance of the product.

Some states do not allow the exclusion or the limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

For any warranty questions, contact 3M Animal Care Products.
