SHAKE WELL BEFORE USING!

DIRECTIONS FOR USE: It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Before use, shake thoroughly and adjust sprayer to deliver a coarse spray.

1. For best results, wash pet with an insecticidal shampoo recommended by a veterinarian prior to application of SECTROL PLUS PET SPRAY. Rinse shampoo thoroughly from hair coat and towel to remove excess water.
2. Hold spray nozzle 4-6 inches from the pet. Apply SECTROL PLUS PET SPRAY to the hair and skin by brushing back the haircoat while spraying. Moisten the skin but do not soak to dripping.
3. Avoiding the pet's eyes and nose, spray the pet evenly over all areas of the body.
4. Allow the pet to air dry. Do not towel dry as this can remove many SECTROL PLUS PET SPRAY microcapsules. A blow dryer may also be used.
5. Wash hands thoroughly with soap and water after application.
6. Applied as directed, SECTROL PLUS PET SPRAY will provide flea kill for up to eight days. For best flea and tick control, reapply weekly.

For temporary relief from biting flies and gnats on horses:

1. Hold spray nozzle 4-6 inches from the horse. Apply SECTROL PLUS PET SPRAY to areas of fly irritation. Moisten the skin but do not soak to dripping.
2. Do not spray directly into horses eyes or nose.
3. Repeat treatment as necessary.
