

DIRECTIONS

Gold Label Copper Compound is the result of many years experience in the formulation of anti-fouling paints. It positively prevents the growth of all marine organisms on boat bottoms.

Preparation of Surfaces

Previously painted wooden hulls or glassed hulls: Scrape off all fouling and loose paint. Scrub with fresh water and allow surface to dry thoroughly. Remove and clean all screens over thru-hull fittings.

New wooden hulls or previously painted surfaces which have been sanded to bare wood: All seams and hull fastenings should be well caulked.

Steel hulls: Scrape off all fouling, scale and other loose foreign matter. Make all necessary underwater repairs. Sandblast to remove all traces of rust down to bare metal. Prime immediately after sand-blasting with a rust inhibitive Primer. When primer is dry, apply a coat of Anti-Corrosive.

Application of Gold Label Copper Compound

Stir paint thoroughly. Do not add thinner or any other ingredient. To properly prepared surface brush on **liberally** one coat of Gold Label Copper Compound. Allow a minimum of 2 hours and a maximum of 48 hours drying time before launching boat.

Bare wooden surfaces should receive 2 coats of Gold Label Copper Compound. Allow at least 2 hours for drying before applying second coat.

DANGER! POISON!
May be fatal if swallowed
Cannot be made Nonpoisonous
Do Not Take Internally.

Active Ingredients	30.2	
Cuprous oxide		23.3
Pentachlorophenol		3.8
Mercuric oxide		3.1
Inactive Ingredients	51.5	
Pigment	22.9	
Red Iron Oxide		11.6
Silica and Silicates		11.3
Vehicle	46.9	
Rosin		20.5
Pine Tar		6.9
Petroleum Distillate		19.5
		100.0

If swallowed, induce vomiting by giving a teaspoon of salt in a glass of warm water, and repeat until vomit fluid is clear. CALL A PHYSICIAN.
Contains Cuprous oxide, mercuric oxide, and pentachlorophenol.

EXTREMELY FLAMMABLE - Keep away from heat and open flame. Use with adequate ventilation. Avoid prolonged or repeated breathing of vapors or contact with skin. Cleanse hands thoroughly before smoking or eating, and after using. Keep container closed.

KEEP OUT OF REACH OF CHILDREN

NET CONTENTS: ONE GALLON

1-7-69

10351-1

Algaecide 10

DIRECTIONS

1. In freshly filled pools or pools showing no visible algae growth add one gallon Algaecide 10 per 50,000 gallons of water to prevent algae growth.
2. If algae growth is observed add one gallon Algaecide 10 for each 20,000 gallons of water to kill and control those algae species most commonly found in swimming pools. When existing growth is dead, clean the pool, drain and refill if necessary and add one gallon Algaecide 10 per 50,000 gallons of water.
3. If the pool water treated as in (1) or (2) is recycled, add one gallon of Algaecide 10 per 50,000 gallons of water every five to seven days to maintain between two and five parts per million active ingredient. See serviceman for test kit.
4. If the pool water treated as in (1) or (2) above is not recycled or not filtered it should be tested periodically to determine the active ingredient content. When necessary one gallon Algaecide 10 per 50,000 gallons of water should be added to maintain two to five parts per million of active ingredient.

FOR CLEAR SPARKLING SWIMMING POOLS

ALGAECIDE 10

ALGAECIDE

ACTIVE INGREDIENTS:

NAL-150 C-14, 40, C-12, 10, C-16,
Dimethyl Benzyl Ammonium Chloride 10

INERT INGREDIENTS:

Water and Ethanol 90

Danger — Keep out of Reach of Children
See Precautions on Side Panel
See antidote and other precautions on side panel

EPA REG. NO. 19169

ANTECH Chemical Co., Inc.

MIDDLETON, MASS.

CONTENTS: ONE QUART

Algaecide 10

DANGER:

Keep out of reach of Children. Causes eye damage and skin irritation. Do not get in eyes, on skin or on clothing. Wear goggles or face shield when handling. Harmful or fatal if swallowed. Avoid contamination of food.

FIRST AID:

In case of contact, flush with water for at least 15 minutes. If irritation persists get medical attention.

If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN:

Possible ocular damage may contraindicate the use of any form of laser. Measures against respiratory shock, respiratory depression, and convulsions may be needed.

FISH & WILDLIFE CAUTION

This product is toxic to fish. Do not discharge or treat effluent where it will drain into lakes, streams, or ponds.

Rinse empty container thoroughly with water and discard it.
