DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Use ACQ-C2 to control all types of fungal decay of wood products - brown, white and soft rot and wood eating insects including termites. ACQ-C2 can be used to treat any wood product that will be exposed to conditions favorable to rot, decay or insect attack both above ground and in ground or water. Types of products include lumber, timbers, landscape ties, fence posts, building and utility poles, land, freshwater and marine piling, sea walls, decking and wood shingles.

Mix ACQ-C2 with either ACQ-Q50 (EPA Reg. No. 6836-51-10356) or ACQ-Q80 (EPA Reg. No. 6836-53-10356) to make treatment solutions. Apply these solutions by pressure impregnation. Follow the mixing instructions on the attached Technical Bulletin No. 1 (Solution Mixing Table for ACQ-C2 2 Component) for obtaining the desired solution concentration. The percent solution to be used should be based on the retention, in lbs. per cubic foot (pcf), specified by the purchaser and by the pressure treating process used.

A single application of a 3% solution can be used to field coat the cut ends of pressure treated wood by brush-on application.
