KILLS AND PROTECTS AGAINST HOUSE, HORN, STABLE AND TABANID FLIES, LICE, FLEAS, MOSQUITOES, ANTS, ROACHES, TICKS AND SPIDERS.

FOR USE ON LIVESTOCK, IN BARN, STABLES, MILK ROOMS, ATTIC AND BASEMENTS.

DIRECTIONS FOR USE: See back panel for detailed instructions. For specific application, see the back panel.

FOR KILLING HOUSE, HORN, HORSE, STABLE, TABANID FLIES AND TICKS ON DAIRY CATTLE, CALVES, BEEF CATTLE AND HOGS: Spray 1-2 oz. FRMACIDE directly on the animal so that the entire body of the animal is covered. Avoid areas around the eyes and mouth. Avoid wetting the hide.

FOR CONTROLLING FLIES IN BARN AND HOLDING AREAS AND MILKROOM: Direct spray upward and toward the center of the holding area and into corners. For best results, close all openings and turn off ventilating systems for at least 10 minutes. Apply FRMACIDE at the rate of 1-2 oz. per 1000 cu. ft. Repeat as necessary.

TO KILL ANTS, ROACHES, SPIDERS, AND CERTAIN OTHER CRAWLING INSECTS IN ATTIC AND BASEMENTS: Apply directly into the infested areas and on the infested surfaces. This drives insects out for contact with killing mist. Spray heavily all cracks, crevices and any place where these insects crawl or breed. Repeat weekly or as needed to maintain lasting control.

CAUTION:

KEEP FROM REACH OF CHILDREN. Harmful if swallowed. FRMACIDE may be used around food products if they are covered to protect against direct contact when spraying. Use as a space spray in Food Processing Plants only when plant is not in operation. Clean surfaces before using. Cover fish bowls, and remove birds for one hour in spraying rooms. Do not spray directly on plants and shrubbery. Avoid freezing. Do not spray heavily on plastics, or asphalt tile. "DO NOT USE, POUR, SPILL, OR STORE NEAR HEAT OR OPEN FLAME."
