USE DIRECTIONS

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Dursban Dust insecticide is a ready-to-use insecticidal dust which controls pests as indicated below. Apply directly into cracks and crevices or other localized areas with a bulbous duster or other suitable equipment. The amount of Dursban Dust to be applied will vary, but should usually be in the range of 1/3 to 2/3 ounces per square yard.

Application Within Residential Buildings including Homes and Apartment Buildings and Within Non-food Areas of Industrial, Institutional, and Commercial Buildings Including Hospitals, Stores, Manufacturing Plants and Warehouses: For Spot Treatment Only -Apply as a light but uniform dust to localized areas where cockroaches, (including strains resistant to certain other Insecticides), ants, clover mites, crickets, firebrats, silverfish and spiders are found or normally occur including dark corners of rooms and closets; cracks and crevices in walls; along and behind baseboards; beneath and behind sinks, stoves, refrigerators and cabinets; around plumbing and other utility installations. For ants apply to ant trails, also around doors and windows and wherever else these pests may find entrance.

For control of American and Smoley Brown Cockroaches in Attic Areas—Apply as a light but uniform dust at a rate of 1/3 to 2/3 ounces per square yard to all unoccupied spaces. For control of carpet beetles, apply dust as a spot treatment along baseboards and edges of carpeting, under carpeting, rugs and furniture, in closets and on shelving, and wherever else these insects are seen or suspected.

For control of ticks and fleas, apply dust as a spot treatment to infested areas such as pet beds and resting quarters, nearby cracks and crevices; along and behind baseboards, window and door frames and lacalized areas of floor and floor covering where these pests may be present. Old bedding of pets should be removed and replaced with clean, fresh bedding after treatment. DO NOT TREAT PETS WITH THIS PRODUCT. To control the source of flea infestation, pets inhabiting the treated premises should be treated with a product registered for application to animals.

Carpenter Ants: Apply dust around doors and windows and other places where ants enter premises and where they crawl or hide. Also force dust into cracks and crevices or through openings or small newly drifted holes into wall voids where ants and/or nests are present. Use a sufficient amount to lightly cover area surfaces.

Wasps, Bees and Hornets: Apply on nest and surrounding area. To treat nests in wall voids, drill a hole in the wall, blow in dust and reseal. Do not use this product to treat overhead nests.

OUTDOOR INSECT CONTROL AROUND HOMES AND BUILDING FOUNDATIONS
By using a pump type Garden Duster or a shaker top canister sprinkle a band of
Dursban Dust 3 to 5 feet wide around the structure next to the building
foundation as a barrier against insect invading the dwelling or place of
business. Use 4 ounces of product to treat a band 5 ft. wide and 20 ft.long
(100 sq.ft.). One pound will treat up to 400 Sq.Ft.; (5 ft.x 80 Ft. band).

This treatment will control commonly found insects which may be present such as Ants, Brown Dog Ticks, Cockroaches, Clover Mites, Field Crickets, Mole Crickets, Earwigs, Fleas, Millipedes, Palmetto bugs, Sowbugs, Springtails, and Spiders. Apply when insects are present and are causing problems, especially in the late spring or early fall. For Ants treat ant trails and mounds as they are found. Repeat as needed for control or every 30 to 45 days when insects are a problem.
