**SPECIAL INSTRUCTIONS FOR IMPROVED PERFORMANCE ARE:**

1. Slugs and snails favor dark, damp places. Bait where these pests stay during daylight hours.
2. Be sure area to be baited is damp. In dry weather, water area well before baiting.
3. Apply bait in evening as these pests feed mainly at night.
4. Until under control, bait should be renewed at least every 7 - 20 days or more frequently if necessary.
5. Since snails and slugs migrate extensively, when invasions from adjacent areas are anticipated a barrier of the bait will aid in control.
