Suite 200
Pasadena, TX 77503

Dear Ms. Lawes:

Subject: Revised labeling
Termi Chlor Termite Concentrate
EPA Reg. No. 10370-140
Your submission dated August 11, 1992

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable. A stamped copy is enclosed for your record.

Submit five (5) copies of your final printed labeling before you release the product for shipment.

Sincerely yours,

DHE

Dennis H. Edwards, Jr.
Product Manager (19)
Insecticide Rodenticide Branch
Registration Division (H7505C)

ACCEPTED

OCT 1 1992

Under the Federal Insecticide, Fungicide, and Rodenticide Act, or amended, for the pesticide registered under FFA Reg. No.

TERMI-CHLOR TERMITE CONCENTRATE

This product treats 60 linear feet.

ACTIVE INGREDIENTS:

Chlorpyrifos (9.0 d-thio) 0 (3,5,6 trichloro 2 pyridyl) phosphorothioate] 12.5%

INERT INGREDIENTS*

Contains 1 pound chlorpyrifos per gallon

total $\frac{87.4\%}{100.0\%}$

* Contains Inert
Pesticide Ingredients

WARNING: KEEP OUT OF REACH OF CHILDREN

PRECAUTIONARY STATEMENTS

Hazards to Humans

CAUSES EYE IRRITATION - HARMFUL IF SWALLOWED

Do not take internally • Do not get in eyes, on skin or on clothing • Wash thoroughly after handling • Wash or change clothes immediately before meals • Avoid breathing dusts and spray mist • Avoid spraying food crops • Keep away from food, feedstuffs, and domestic water supplies • Keep container closed • Handle only in a well-ventilated area

STATEMENT OF PRACTICAL TREATMENT

If Swallowed: Do not induce vomiting. Contain vomit in petroleum solvent. Call a physician immediately. If On Skin: Wash immediately with plenty of water. If In Eyes: Flush eyes with plenty of water for at least 15 minutes. Consult a physician. Note To Physician: Chlorpyrifos (9.0 d-thio) 0 (3,5,6 trichloro 2 pyridyl) phosphorothioate. Treat symptomatically. Antidote: Only by physician's advice.

ENVIRONMENTAL HAZARDS

Termi-Chlor Termite Concentrate is toxic to fish, birds, and other wildlife. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes.

PRECAUTION: Avoidance of contact with open flames. The data product is toxic to aquatic life. Do not use this product until the label has been fully understood.

TRANSLATION TO THE USER: If you are a user of this product, do not use this product until the label has been fully understood.

PHYSICAL OR CHEMICAL HAZARDS

FLAMMABLE • Do not store near heat or open flame • Do not put in wind contact

STORAGE AND DISPOSAL

Do not store Termi-Chlor Termite Concentrate in a hot, dry area. Store in original container only and in a cool, dry place. Store in a well-ventilated area. Do not store in a place accessible to children. Disposal: Do not dump into water. Empty containers thoroughly, and wrap securely in several layers of heavy paper or plastic.

AGRICULTURAL CHEMICAL

Do not ship or store with food, feed, drugs or clothing

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH LABEL PRECAUTIONARY STATEMENTS AND DIRECTIONS.

GENERAL: TERMI-CHLOR Termite Concentrate is particularly useful for prevention and control of ants, termites and certain wood destroying insects. For termite control, the chemical solution should be adequately diluted in the soil to provide a barrier between the wood in the structure and termites or in the soil. It may also be used for treatment of infested areas of wooden structures, firewood piles and stored lumber to control wood destroying termites, carpenter ants, and carpenter bees. In addition, this product controls many common pests in lawns and other outdoor areas around the home. Make a withdrawal for each use. SHAKE WELL BEFORE USING. NOTE: 2 TBS equals 1 FL OZ.

FOR TERMITES (Outdoors): Remove all wood debris and wood forms. For prevention and light infestation, treat soil adjacent to the structure. For infested foundations, dig a powder trench 2 feet wide and 4 in. deep in down the top of the footing whichever is best. For brick and block foundations dig the trench at least 12 in. deep. If footing is more than 12 in. deep, make both holes with a crowbar, pipe or hand. Treat 1 foot apart that extends from the trench bottom to the top of the footing. NEVER DIG BELOW THE TOP OF THE FOOTING. Avoid contamination of public water supplies. This material by following these precautions: Do not allow a hose or any type of faucet extension to reach the termite chemical solution while filling. This material with water. Use only a flow or anti-siphonage equipment on all filling equipment. These devices can be purchased at hardware or plumbing stores. Use of anti-backflow equipment will be ensure that the user of this toxic chemical will not contaminate domestic water supplies. Refer to FFA Federal Insecticide, Fungicide, and Rodenticide Act and label for safety. Note: When conditions will not permit trenching, surface application may be used to interior walls. Walls may be made if the treated strip should not exceed 18 in. width. Apply solution with a spraying gun. Mix 5 1/2 fl. oz. per gallon of water and treat 20 linear feet. Do not treat soil that is water saturated or frozen. Mix solution into soil and replace in the trench. Cover treated soil with a layer of untreated soil. Be sure to treat the interiors of accessible hollow block foundations at same rate as above. Be careful to have adequate ventilation when treating areas under structure. For severe infestations or treatment under slabs, in basements and buildings with insufficient crawl space, etc., contact a licensed pest control operator or termite control service. Annual retreatment of entire premises must be avoided.

FENCE POST—TERMITE PREVENTION: Apply one gallon of diluted TERMI-CHLOR Termite Concentrate per post hole. Pour 1/2 of solution into hole and add the remaining 1/2 gallon diluted solution to the soil when filling the hole so that all of the soil is treated.

TREATMENT FOR WOOD DESTROYING PESTS (Outdoors) (Powder Post Beetles, Furniture Beetles, Death Watch Beetles, Round headed Borers, Carpenter Ants, Carpenter Bees): Treat localized areas of infested wood with a paint brush, use 2 1/2 TBS. For wood piles and stored lumber apply 1/2 fl. oz. per gallon of water. Use a spraying can or COMPRESSED AIR SPRAYER and deliver a narrow directed spray. Do not use in structures occupied by animals, to be used for food purposes or which produce products for human consumption.
