TERMI-CHLOR® TERMITE CONCENTRATE

* THIS PRODUCT TREATS 60 LINEAR FEET

ACTIVE INGREDIENTS:

Contains I lb. chlorpyrifos per gallon.

†Contains Aromatic Petroleum Distillates.

Termi-Chlor is a registered trademark of Roussel Uclaf Corporation.

PRECAUCION AL USUARIO: Si usted no lee ingles, no use esta producto hasta que la etiqueta le haya sido explicada ampliamente.

TRANSLATION (TO THE USER: If you cannot read English, do not use this product until the label has been fully explained to you.)

EPA REG. NO. 10370-140

EPA EST. NO.

WARNING

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: Do not induce vomiting. Contains aromatic petroleum solvent. Call a physician immediately.

IF ON SKIN: In case of contact, remove contaminated clothing and immediately wash skin with plenty of soap and water.

IF IN EYES: Flush eyes with plenty of water for at least 15 minutes. Call a physician.

NOTE TO PHYSICIAN: Chlorpyrifos is a cholinesterase inhibitor. Treat symptomatically. Atropine only by injection is an antidote.

PRECAUTIONARY STATEMENTS Hazards to Humans

CAUSES EYE IRRIT ATION - HARMFUL IF SWALLOWED Do not take internally. Do not get in eyes, on skin or clothing. Wash thoroughly after handling. Wash contaminated clothing before reuse. Avoid breathing vapors and spray mist. Avoid spraying food crops. Keep away from food, feedstuffs, and domestic water supplies. Keep container closed. Handle concentrate in a ventilated area.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds and other wildlife. For terrestrial uses, do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not cuntaminate water by cleaning of equipment or disposal of wastes.

PHYSICAL OR CHEMICAL HAZARDS

COMBUSTIBLE. Do not use or store near heat or open flame. Do not out or weld container.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its !abeling. READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH LABEL PRECAUTIONARY STATEMENTS AND DIRECTIONS.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Store in original container only and in locked storage area. Store in areas inaccessible to children.

Disposal: Do not reuse container. Rince thoroughly and wrap securely in several layers of newspaper and discard in trash.

AGRICULTURAL CHEMICAL

Do not ship or store with food, feed, drugs or clothing.

GENERAL: TERMI-CHLOR Termite Concentrate is particularly useful for prevention and control of ants, termites and certain wood destroying insects. For termites, the chemical solution should be adequately dispersed in the soil to provide a lethal barrier between the wood in the structure and termite colonies in the soil. It can also be used for treatment of localized areas of wooden structures, firewood piles and stored lumber to control wood infesting borers, carpenter ants and carpenter bees. In addition, this product controls many common pests in lawns and other outdoor areas around the home. Make new dilution for each use. SHAKE WELLBEFORE USING. NOTE: 2 TBS. equals 1 fl. oz.

FOR TERMITES (Outdoors): Remove all wood debris and wood forms. For prevention and light infestation, treat soil adjacent to both sides of infested foundations of poured concrete, pipes or piers by digging a trench 6 in. wide and 4 in. deep (or down the top of the footing whichever is less). For brick and block foundations dig the trench about 12 in. deep. If footing is more than 12 in deep, make both holes with a crowbar, pipe or a rod about 1 foot apart that extends from the trench bottom to the top of the footing. NEVER DIG BELOW THE TOP OF THE FOOTING. Avoid contamination of public and private water supplies by following these precautions. Do not allow a hose or any type of faucet extension to reach the termite chemical solution while filling or mixing this material with water. Use anti-backflow or anti-siphonage equipment on all filling equipments. These devices can be purchased at hardware or plumbing supply stores. Use of anti-backflow equipment will help insure that the user of

BEST AVAILABLE COPY

this toxic chemical will not contaminate domestic water supplies. Refer to FHA (Federal Housing Administration), State, and local specifications for safety distance of treatment areas from wells. Soil in the vicinity of wells, cistems or ponds should not be treated. Do not treat structures that contain cistems or wells. NOTE: When conditions will not permit trenching, surface application adjacent to interior foundation walls may be made but the treated strip should not exceed 18 in. width. Apply solution with a sprinkling can. Mix 5 1/3 fl. oz. per gallon of water and treat 2 1/2 linear feet of trench or foundation (one-half gallon of TERMI-CHLOR Termite Concentrate will make 12 gallons of diluted solution and treat 30 linear feet). Do not treat soil that is water saturated or frozen. Mix solution into soil and replace in the trench. Cover treated soil with a layer of untreated soil. Be sure to treat the interiors of accessible hollow block foundations at same rate as above. Be careful to have adequate ventilation when treating areas under structure. For severe infestations or treatment under slabs, in basements and buildings with insufficient crawl space, etc., contact a licensed pest control operator or termite control service. Annual retreatment of entire premises must be avoided.

FENCE POST - TERMITE PREVENTION: Apply one gallon of diluted TERMI-CHLOR Termite Concentrate per post hole. Pour 1/2 of solution into hole and add the remaining 1/2 gallon diluted solution to the soil when filling the hole so that all of the fill soil is treated.

TREATMENT FOR WOOD DESTROYING PESTS (Outdoor: Powder Post Beetles, Furniture Beetles, Death Watch Beetles, Round-Headed House Borers, Carpenter Ants, Carpenter Bees). Treat localized areas of infested wood. With a paintbrush, use 2 1/2 TBS. (tablespoons) per quart of water. Apply emulsion evenly on wood surfaces. Allow to dry and repeat treatment to ensure penetration. For wood piles and stored lumber apply 5 1/3 fl. oz. per gallon of water. Use a sprinkling can or COMPRESSED AIR SPRAYER and deliver a coarre drenched spray. Do not use in structures occupied by animals to be used for food purposes or which produce products for human consumption.

Notice: Buyer assumes all responsibility for safety and use not in accordance with directions.
