## PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed, inhaled or absorbed through the skin. Cause moderate eye irritation. Avoid breathing vapor, or dust. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling and before eating or smoking. Wash contaminated clothing with soap and hot water before re-use. Do not use grass clippings for animal feed.

ENVIRONMENTAL HAZARDS

Do not contaminate water by cleaning of equipment or disposal of wastes. Do not use on crops grown for food or forage. Do not apply directly to water. Apply this product only as specified on this label. Do not apply when weather conditions favor drift from target area.

#### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

#### STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. STORAGE. Store product in original bag in a cool, dry, locked place out of reach of children. PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. CONTAINER DISPOSAL: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allo by State and local authorities, by burning. If burned stay out of smoke. HOUSEHOLD: Do not re-use empty bag. Wrap and put in trash.

Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes.

Bayleton® is absorbed rapidly and works systemically from within the plant. Rainfall or sprinkler irrigation soon after application will assure rapid systemic uptake. Control will be less effective on turf suffering from drou stress. Therefore in order to achieve maximum control, plants should be maintained in a vigorously growing state through good cultural practices. Apply when the turf is fully established and actively growing. Applications should be applied at recommended intervals to maintain control.

TURP DISEASES AND RATES FOR PREVENTIVE AND/OR CURATIVE TREATMENTS

•		REATMENT CH TO USE O SQ.FT	REMARKS FOR PREVENTIVE AND CURATIVE TREATMENTS	
	PREVENTIVE 1 1 16s.	CURATIVE	PREVENTIVE RATE: Apply recommended rate on 30 day intervals.  [Protective activity of product may extend for as long as 60 days dependent upon environmental conditions.	
DOLLAR SPOT	1.5 1bs.	     - 	PREVENTIVE RATE: Apply recommended rate on 14 day intervals.   Protective activity of product may extend for as long as Juliday:   dependent upon environmental conditions.	
	-	   6 1bs 	COURATIVE RATE: To control existing infections, apply the curative rate. Subsequent applications should be applied as a preventive schedule. Reapplication should be no closer than it days. When infestations have been controlled refer to the preventative rate schedule for rates and theing.

## TURF DISEASES AND RATES FOR PREVENTIVE AND/OR CURATIVE TREATMENTS

DISEASE	TYPE OF TREATMENT AND HOW MUCH TO US PER 1,000 SQ.FT.	REMARKS FOR PREVENTIVE AND CURATIVE TREATMENTS
COPPER SPOT PYMOERY MILDEN RED THREAD (Laetisara fuciformis)		IVE PREVENTIVE RATE: Apply at 15 to 30 day intervals. When environ- mental conditions favor light to moderate disease development, just a longer interval. Protective activity of this product can be greater than 30 days depending on environmental conditions.
RUSIS  BROWN PAICH (Rhizoctonia solani) (Supression)	} 3 lbs.	CURATIVE RATE: To control existing infections, apply the curative rate. Subsequent applications should be applied on a preventive schedule and rate. Reapplication should be not closer than 14 days. When infestations have been controlled refer to the preventive rate schedule for rates and timing.
ANTHRACHOSE  POA ANNUA  DECLINE	6 1bs.	PREVENTIVE RATE: Apply at 30 day intervals and repeat as [necessary for seasonal control. Dependent upon environmental [conditions, residual control may be extended to 45 days. [PREVENTIVE RATE: Apply at 30 day intervals and repeat as [necessary for seasonal control. Dependent upon environmental [conditions, residual control may be extended to 30 days. [CURATIVE RATE: To control existing infections, apply the [curative rate. Subsequent applications should be applied on [preventive schedule and rate. Reapplication should be no closer [than 14 days. When infestations have been controlled refer to the [preventive rate schedule for rates and timing.]
STRIPED SHUT	PREVENTIVE RATE ONL 6 16s.	
FUSARIUM BLIGHT (Fusarium spp.)	(Except California   6 lbs.   (California Only)   6 to 12 lbs.	Apply 1st applications in mid-June or 30 days prior to time this   blight normally becomes evident. Apply at 30 day intervals.   For California Only apply at 6 lbs. rate on 15 day intervals or   at the 12 lb. rate on 30 day intervals.
GRAY SNOW MOLD (Typhula incarnata) Except California	 	Apply in fall 30 days prior to turf dormancy. If turf breaks dormancy during winter months a second application should be leade. Do not apply over snow cover, or when turf is dormant.
PINK SNOW MOLD FUSARIUM PATCH (Fus-rium nivale) SOUTHERN BLIGHT (Sclerotium rolfsii Except California	İ	Apply before conditions favorable for infection occur, Repeat as needed at 60 to 90 day intervals. Do not apply over show cover or when turf is domant. Use high rate in turf with a history of its severe yearly disease damage.
GRAY SHOW MOLD PINK SHOW MOLD California Only		Apply in late fall before snow cover. On not apply over snow.  It luse the high rate in areas with a history of severe snow mold liture damage.

### LAWN FUNGICIDE GRANULES

5 7 5

WHEN TO USE: Make application when turf is dry and following the mowing operation. Do not mow until minimum of 1/4 inch of water has been applied the treated area.

LAWN DISEASE CONTROL IS BASED ON PROPER APPLICATION
The following spreader settings are for use with new equipment. Your used spreader may need calibrating. Since proper application is based on the spreaders condition with regard to age and use, your walking speed and the evenness of the terrain, your spreader may require a slight adjustment.

If you have reason to believe that your spreader is not calibrated correctly test apply by placing the amount for 500 Sq.Ft. into your spreader and apply to your pre-measured 500 Sq.Ft.(5 ft. wide by 100 ft long)

HOW TO MAKE SURE YOUR SPREADER IS OPERATING CORRECTLY Using a Scott Spreader For Disease Control place 1.50 lbs. granules in your spreader using No.4 1/2 setting & apply to 500 Sq.Ft. With a 20 inch spreade this will equal 3 spreader widths wide (3 passes) by 100 feet long. If you run out before you cover the pre-measure area close the spreader setting by 1/2 the number. If you have granules left over, open (increase) the spreasetting by 1/2 the number. For further help refer to your Spreader Guide Boo

POOR DISEASE CONTROL WILL RESULT IF YOUR SPREADER APPLIES LESS GRANULES THAN RECOMMENDED.... MAKE SURE TO APPLY THE TOTAL POUNDS PER SQUARE FEET AS SHOWN IN THE FOLLOWING CHART.

		SPREADER SETTINGS	
SPREADER	AMOUNT TO APPLY	18 POUNDS   PER 6,000 SQ.FT.	18 POUNDS PER 3,000 Sq.Ft.
		3.0 lbs./1,000 Sq.Ft.	6.0 lbs./1,000 Sq.Ft.
Scott	18 pounds _	# 4 1/2	# 6
Cyclone	18 pounds	# 3	# 4

When using a 18 lb. bag; spreader settings will be the same as for the 36 lb bag but it will treat only have the amount of Sq.Ft. as the 36 lb bag. These settings are based on a "One Time Over" application.

Notice: Buyer assumes all responsibility for safety and use not in accordance with directions.
