Keep container closed when not in use. Remove contaminated clothing and wash before reuse.

In case of swallowing, induce vomiting with mustard and warm water and immediately call a physician for further attention.

# HODAG CHEMICAL CORPORATION - SKOKIE, ILLINOIS U.S.A.

## **DIRECTIONS FOR USE:**

=

HODAG SANITROL MICROBIOCIDE is a liquid product which can be metered into the cane juice by means of a small pump. It is important to feed the product in such a manner as to insure complete circulation of treated juice throughout the mill tandem. The product should be added continuously to the juice at a minimum rate of 10 ppm up to but not exceeding a maximum of 20 ppm based on the solution as received in the drum. The feed rate must not exceed 43 pounds (4.5 gallons) per 1000 tons of sugar cane.

When used regularly in this manner, inversion losses, bad odors and gummy deposits resulting from the growth of micro-organisms are reduced to a minimum.

See Bulletin No. D11-568 For Additional Use-Directions
