NOTIFICATION

SEP 7 - 2001

Explanation: Use additional page(s) if necessary. (For section I and Section II.)

Notification of Combination of Redundant Labeling Statements per PR Notice 98-10.
This notification is consistent with the provision of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statements to EPA. I understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under Section 12 and 14 of FIFRA.

Wash or brush off walks and painted surfaces following application to avoid staining.
Made in U.S.A. F1406

...of Sod Webworms. Repeat applications may be made as needed for control of new insect infestations.

SURFACE FEEDING INSECTS

For Ants, Armyworms, Centipedes, Chiggers, Cutworms, Earwigs, Fall Armyworms, Flery Skippers, Grasshoppers, Green June Beetle Grubs, June Beetles, Leafhoppers, Lucerne Moth Larvae, Millipedes, Sowbugs, Spittlebugs, Springtails, Ticks, and Yellowstriped Armyworms:
Apply 2.3 lb/1,000 sq ft when insects become a problem or their damage is imminent. This is equivalent to 4 lb A.I. Carbaryl per acre. Refer to General Directions for Lawns & Ornamental/Recreational Turf.

FOR CHINCH BUGS AND SOD WEBWORMS

Apply 3.45 lb/1,000 sq ft of turf which is equal to 6.0 lb A.I. Carbaryl per acre. For Chinch Bugs, treat entire area to prevent their migration. For Sod Webworms, do not irrigate treated areas for 24 to 48 hours after treatment. Repeat applications may be made at 30-day intervals or as needed for control of new infestations. For heavy infestations, increase rate to 4.6 lb per 1,000 sq ft and treat entire area.

ROOT FEEDING INSECTS

For control of White Grubs (such as Japanese Beetle, Chafer Beetles, and Phyllophaga spp. Larvae), Bluegrass Billbugs, Fleas, European Crane Fly Larvae, and Black Turfgrass Ataenius:

Apply 4.6 lb per 1,000 sq ft of turf area (equal to 8 lb A.I. Carbaryl per acre) during late March through May or July to early September when grubs are feeding near the soil surface or as recommended by local agricultural extension agents. Water or irrigate turf thoroughly soon after treatment to move the insecticide into the root feeding zone. See General Directions.

For Crane Fly Larvae, apply at the same rate in early spring: April 1 to April 15 or as recommended by the local Extension Service. Irrigate area after treatment to move granules into root feeding zone.

FOR FLOWERING PLANTS AND SHRUBS IN LANDSCAPE AND FOUNDATION PLANTINGS

For Cutworms, Armyworms, Sowbugs, Millipedes, and Centipedes which attack ornamental and flowering plants in shrubbery and foundation plantings, apply 2.3 lb granules evenly over 1,000 sq ft (20 x 50 ft.). Repeat as needed for control up to 3 times per year.

CONTROL OF TICKS THAT VECTOR LYME DISEASE

For control of juvenile and adult ixodes spp. (Deer Tick and Black Legged Tick) and Amblyomma spp. ticks (Lone Star Ticks) which vector Lyme Disease. Apply granules at the rate of 4 to 4.6 pounds of product per 1,000 sq ft with appropriate equipment to ensure uniform coverage. Target applications to control juvenile ticks (larvae and nymphs) in late spring or early summer (May/June). Control of adult ticks can be achieved with late summer and fall applications (August/September). Make applications to lawns, shrub beds, ornamental plantings, wooded areas and around outside perimeters of home and other buildings. Do not make spot applications. Treat entire lawn and perimeter wooded areas and property boundaries where exposure to ticks may occur. For optimum results, irrigate treated areas after application to remove chemical from the granules. Ticks may be reintroduced from surrounding areas on host animals. Retreat as necessary to maintain adequate control levels.

Approximate Spreader Settings for LESCO Rotary Spreader®

Table with 4 columns: Pounds Product / 1,000 sq. ft., A/I/A, Effective Spreading Width, Third Approximate Hole Setting. Rows include 2.30 lbs., 3.45 lbs., and 4.60 lbs.

*IMPORTANT: These settings are only approximate. Age, condition of the spreader, and operator speed can cause wide variation. Be sure to calibrate your spreader with each application.

WARRANTY

LESCO warrants that this product conforms to the chemical description on its label. When used in accordance with label directions under normal conditions, this insecticide is reasonably fit for its intended purposes. Since timing, method of application, weather, plant and soil conditions, mixture with other chemicals, and other factors affecting the use of this product are beyond our control, no warranty is given concerning the use of this product contrary to label directions or under conditions which are abnormal or not reasonably foreseeable. The user assumes all risks of any such use.

Information concerning the raw materials composing this product can be obtained by writing to: LESCO, Inc., Attn. RA Dept., 15885 Sprague Road Strongsville, OH 44136-1799, referring to the item number found on this bag.

KEEP OUT OF REACH OF CHILDREN CAUTION

"PRECAUTION AL USUARIO: Si usted no lee ingles, no use este producto hasta que la etiqueta haya sido explicado ampliamente"

STATEMENTS OF PRACTICAL TREATMENT

If swallowed: Call a physician or Poison Control Center immediately. Induce vomiting by giving victim 1 to 2 glasses of water and by touching back of the throat with finger. Do not induce vomiting or give anything by mouth to an unconscious or convulsing person.

If in eyes: Flush eyes with plenty of water. Get medical attention if irritation persists.

If on skin: Remove contaminated clothing and wash affected area with soap and water. Get medical attention if irritation persists.

If inhaled: Remove victim to fresh air. Apply artificial respiration if indicated. Get medical attention.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed or inhaled. Avoid breathing dust. Avoid contact with eyes, skin and clothing. Wash thoroughly after handling and before eating or smoking. Change to clean clothing daily. Do not contaminate feed or foodstuffs.

ENVIRONMENTAL HAZARDS

This product is extremely toxic to aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters. This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow to drift on blooming crops or weeds if bees are visiting the proposed treatment areas.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

Storage: Keep out of reach of children and animals. Store in original containers only. Store in a cool, dry place and avoid excess heat. Carefully open container. In case of spill: Avoid contact, isolate area, and keep out animals and unprotected persons. Confine spills.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Do not reuse empty bag. Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by state or local authorities, by burning. If burned, stay out of smoke.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labelling.

GENERAL DIRECTIONS

Best insect control will be obtained if troublesome "thatch" is mechanically removed or raked from the area before treating. This destroys insect habitats, allows granules to move to the insect feeding zone, and makes the fertilizer more quickly available to plants.
