Subject: Label Notification(s) for Pesticide Registration Notice 2007-4 and 98-10 1. Updated warranty statement

Dear Ms. Spencer:

The Agency is in receipt of your Application(s) for Pesticide Notification under Pesticide Registration Notice (PRN) 2007-4 and 98-10 dated August 28, 2009 for:

EPA Registration 10404-102	LESCO PRE-M 0.75% Plus Fertilizer
EPA Registration 10404-100	LESCO PRE-M 0.86% Plus Fertilizer
EPA Registration 10404-101	LESCO PRE-M 1.00% Plus Fertilizer
EPA Registration 10404-82	LESCO PRE-M 1.31% Plus Fertilizer
EPA Registration 10404-98	LESCO PRE-M 1.50% Plus Fertilizer

The Registration Division (RD) has conducted a review of this request for applicability under PRN 2007-4 and 98-10 and finds that the label change(s) requested falls within the scope of PRN-2007-4 and 98-10. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on <u>nonrefillable</u> containers. The code may appear either on the label (and can be added by nonnotification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please contact me directly at 703-305-6249 or Nicole Williams of my staff at 703-308-5551.

Sincerely,

Linda Arrington Notifications & Minor Formulations Team Leader Registration Division (7505P) Office of Pesticide Programs

#### **GENERAL INFORMATION**

This product is a combination pre-emergent herbicide and fertilizer formulated to provide control of most annual grasses and certain broadleaf weeds found in turfgrass. This product is labeled for use on the following turfgrass species: Kentucky Bluegrass, Perennial Ryegrass, Fine Fescue, Tall Fescue, Bentgrass, Poa annua (except putting greens and tees), Bermudagrass, St. Augustinegrass, Bahiagrass, Centipedegrass, and Zoysiagrass.

This product controls weeds as they germinate but will not control established weeds. Unusually cold, excessively wet, or hot and dry conditions that delay germination or extend germination over a long period of time can reduce weed control

Applied according to label directions and under normal growing conditions, this product will not cause turf injury. Over-application can result in tur? stand loss, turf injury, or soil residues. Uneven application can decrease weed control or cause turf injury.

Seedling diseases, cold weather, excessive moisture, high'soil 'pH, high soil salt concentration, or drought can weaken tuifyrass and increase the possibility of turf damage from this product. נ **נ** נ נ

#### APPLICATION

Apply product uniformly at the recommended rate using a properly calibrated spreader (see table below for approximate settings). The officacy of this product will be improved if the application is followed by cac-balf inch oprainfall or its equivalent in sprinkler irrigation. This will remove the product from the turfgrass foliage and establish a pre-emergent herbicide barrier in the soil. Avoid contact of product with porous surfaces such as driveways, stone, or wood. Renicizing particles will help prevent staining.
