**NOTIFICATION**  
MAY 06 2003

**Explanation:** Use additional page(s) if necessary. (For section I and Section II.)

Notification of Alternate Brand Name per PR Notice 98-10: LESCO Barricade 0.43% Plus Fertilizer. This notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

### Section - IV

1. Contact Point (Complete items directly below for identification of individual to be contacted, if necessary, to process this application.)		
Name Gloria M. Sieloff	Title Director, Regulatory Affairs	Telephone No. (Include Area Code) 440-783-9250 ext. 2597
<b>Certification</b> I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment both under applicable law.		8. Date Application Received (Stamped)
2. Signature <i>Gloria Sieloff</i>	3. Title Director, Regulatory Affairs	
4. Typed Name Gloria M. Sieloff	5. Date 5/23/03	

with soap and water after handling. Prolonged or frequently repeated skin contact while handling the material may cause allergic reactions in some individuals.

**Statements of Practical Treatment**

**In eyes:** Flush thoroughly with water for several minutes. Get medical attention if irritation persists.

**On skin:** Wash with soap and water. Rinse thoroughly. Get medical attention if irritation persists.

**Inhaled:** Remove victim to fresh air.

**Environmental Hazards**

This product has low solubility in water. At the limits of solubility, this product is not toxic to fish. However, at concentrations above the level of water solubility, it may be toxic to fish. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to aquatic organisms in adjacent sites. Do not contaminate water when disposing of equipment washwaters.

**STORAGE AND DISPOSAL**

of contaminate water, food, or feed by storage or disposal.

**SAFETY:** Store in original container away from other fertilizer, feed, or food stuffs and separated from other pesticides. **PESTICIDE DISPOSAL:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

**CONTAINER DISPOSAL:** Paper and Plastic Containers: Completely empty container into application equipment. Then dispose of empty container in a sanitary landfill or at an incineration facility, or, if allowed by state and local authorities, by burning locally. If burned, stay out of smoke.

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

This product is a selective preemergence herbicide that provides residual control of many grass and broadleaf weeds in established turf grasses (including golf course putting greens) and lawns; landscape ornamentals; and established perennials & wildflower plantings. This product controls susceptible weeds by inhibiting weed seeds germination and root development. Most effective weed control will be obtained when this product is activated by at least 0.5 inch of rainfall or irrigation prior to weed seed germination and within 14 days following application.

Not for use on plants being grown (1) for sale or other commercial use, (2) for commercial seed production, or (3) for research purposes. For use on plants intended for aesthetic purposes or climatic modification and being grown in ornamental gardens or parks, or on golf courses or lawns and grounds.

Do not graze or feed livestock forage cut from areas treated with this product.

Do not apply this product through any type of irrigation system.

Do not apply serially.

Do not apply to golf course putting greens.

**Application Directions**

Apply uniformly through suitable, calibrated commercial application equipment.

**ESTABLISHED TURF**

This product is a selective preemergence herbicide that, when properly applied, will control certain grass and broadleaf weeds in established turf grass and lawns. The maximum amount of this product that may be applied per year is given for each turf grass species in the Maximum Annual Rates section of this label.

Most effective weed control in turf grasses will be obtained when this product is activated by at least 0.5 inch of rainfall or irrigation prior to weed seed germination and within 14 days following application. See the map below for approximate crabgrass seed germination dates.

**CRABGRASS SEED GERMINATION DATES Approximate Date**

**Use Precautions**

The following use precautions apply to the use of this product in turf grasses and lawns:

Application of this product may thin emerged annual bluegrass and newly over-seeded grasses.

Do not apply to overseeded turf for 60 days after seeding or until after the second mowing, which ever is longer. Injury to desirable seedlings is likely if this product is applied before seedling secondary roots are in the second inch of soil, not thatch plus soil.

Do not treat sod before 120 days after application. Do not apply to newly set sod until the following year.

Application of this product to turf stressed by drought, low fertility, or pest damage may result in turf injury.

Disturbing the herbicide barrier with cultural practices such as diking may result in reduced weed control.

Do not apply this product to putting greens or areas where dichondra, colonial bentgrass, velvet bentgrass or annual bluegrass (Poa annua) are desirable species.

**Rates of Application**

This product may be applied as a single application or in sequential applications to control weeds germinating throughout the year. All applications must be made prior to germination of the target weeds. This product will not control established weeds. Maximum use rate selection should be based on turf species. The length of time of residual weed control provided by this product is related to the rate applied.

**Maximum Annual Rates**

This product is recommended for use on the turf grass species listed in the following table. Do not exceed the maximum yearly rate as given in the following table.

MAXIMUM APPLICATION RATE/CALENDAR YEAR OF LESCO Fertilizer with 0.43% Barricade Pre-emergence Herbicide by Turf Grass Species <sup>1</sup>		
Turf Species:	lb. LESCO Fertilizer with 0.43% Barricade / Acre	lb. a.i. per A.
Bermudagrass <sup>2</sup> Bahiagrass Centipedegrass Seashore Paspalum St. Augustinegrass Tall Fescue (including turf-type) Zoysiagrass	349 lbs./A. (= 8.01 lbs./1,000 sq.ft.)	1.5# / Acre
Buffalograss Kentucky Bluegrass Carrington Paspalum Creeping Red Fescue Creeping Bentgrass	233 lbs./A. (= 5.34 lbs./1,000 sq.ft.)	1.0# / Acre
178 lbs./A. (= 4.12 lbs./1,000 sq.ft.)		0.7# / Acre
180 lbs./A. (= 3.94 lbs./1,000 sq.ft.)		0.6# / Acre

- These are the maximum rates per calendar year by species limitations.
  - May be used on newly sown or planted Bermudagrass at rates not to exceed 121 lbs./Acre. Newly applied or sown Bermudagrass alone or rooting may be temporarily retarded. Suppression only of Paspalum, Goosegrass and Rescuegrass due to reduced product rates used in spring situations.
  - Use at an initial rate of 178 to 233 lbs./Acre per application followed by sequential applications at doses that would not exceed the maximum annual application rate of 349 lbs./Acre/year.
- Do not apply more than 349 lbs. of this product per calendar year.
- Use the higher rates of this product to achieve higher levels of fertility and weed control for each turf type.

**WHEN TO OVERSEED AT LATE APPLICATION**

This product will inhibit the germination of turf species if overseeded too soon after application. Follow rates and intervals in the table below for best overseeding/reseeding results.

Product	Rate (lb./Acre)	Interval Before Overseeding		
		North	Transition	South
180 lbs./A	0.50	4 months	4 months	4 months
190 lbs./A	0.68	5 months	4 months	4 months
178 lbs./A	0.74	6 months	5 months	6 months
185 lbs./A	0.80	6 months	6 months	6 months
233 lbs./A	1.00	7 months	7 months	7 months
265 lbs./A	1.14	7 months	8 months	9 months
302 lbs./A	1.30	7 months	9 months	10 months

**LANDSCAPE ORNAMENTALS**

(Including Established Perennial and Wildflower Plantings)

This product may be applied for residual preemergence weed control in ornamentals. Use Rates - Apply this product at 180 to 349 lbs./A in fall and/or spring. Use the higher rates of application for longer control periods. Sequential or single applications are allowed so long as the total amount of product applied does not exceed the maximum annual application rate of 349 pounds, per acre, per year.

**Application Timing and Information**

This product may be applied to newly transplanted and established ornamentals as a broadcast, over the top or directed application. Irrigation or rainfall soon after application will wash residues off plant foliage and activate this product in the soil. This product may be applied at any time to established plants. Delay application to allow soil to settle around new transplants and water thoroughly before applying this product. Apply this product after cuttings form roots and become established. Apply before budding/grafting or after buds/grfts have taken to avoid any inhibition of the tissue union. This product is a preemergence herbicide and will not control emerged weeds. Most effective weed control in ornamentals will be obtained when this product is activated by at least 0.5 inch of rainfall or irrigation, or with shallow (1 to 2 inch) mechanical incorporation, prior to weed seed germination and within 14 days following application. Best weed control is obtained when this product is applied to soil free of clods, weeds, and debris such as leaves. Prior to application of this product, control existing vegetation by hand weeding, cultivation or the use of an appropriate post-emergence herbicide.

**Tolerant Ornamental Species**

This product will not harm most established ornamental trees, shrubs and flowers. The species listed below are tolerant to this product. Best results will be obtained when this product is uniformly applied to the soil surface; avoid applying to ornamental shoots which may defeat the effort to get uniform distribution on the soil surface. This product may be applied over the top of these species without injury.

**CAUTION:** Causes moderate eye injury (irritation). Causes eye irritation if sprayed or splashed through the skin. Avoid contact with skin, eyes, or clothing. Avoid breathing dust. Wash thoroughly with soap and water after handling. Prolonged or frequently repeated skin contact while handling the material may cause allergic reactions in some individuals.

**First Aid:** If in eyes: Flush thoroughly with water for several minutes. Get medical attention if irritation persists. If on skin: Wash with soap and water. Rinse thoroughly. Get medical attention if irritation persists. If inhaled: Remove victim to fresh air.

**Environmental Hazards:** This product has low solubility in water. At the limits of solubility, this product is not toxic to fish. However, at concentrations above the level of water solubility, it may be toxic to fish. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to aquatic organisms in adjacent sites. Do not contaminate water when disposing of equipment washwaters.

**STORAGE AND DISPOSAL**

of contaminate water, food, or feed by storage or disposal. **AGG:** Store in original container away from other fertilizer, feed, or food stuffs and secured from other pesticides. **HAZARDOUS WASTE:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. **CONTAINER DISPOSAL:** Paper and Plastic containers: Completely empty container into application equipment. Then dispose of empty container in a sanitary landfill or at an incineration facility, or, if allowed by state and local authorities, by burning locally. If burned, stay out of smoke.

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

This product is a selective pre-emergence herbicide that provides residual control of many grass and broadleaf weeds in established turf grasses (excluding golf course putting greens) and lawns; landscape ornamentals; and established perennials & wildflower plantings. This product controls susceptible weeds by inhibiting weed seed germination and root development. Most effective weed control will be obtained when this product is activated by at least 0.5 inch of rainfall or irrigation prior to weed seed germination and within 14 days following application.

Not for use on plants being grown (1) for sale or other commercial use, (2) for commercial seed production, or (3) for research purposes. For use on plants intended for aesthetic purposes or climatic modification and being grown in ornamental gardens or parks, or on golf courses or lawns and grounds. Do not graze or feed livestock forage cut from areas treated with this product. Do not apply this product through any type of irrigation system. Do not apply aerially. Do not apply to golf course putting greens.

**Application Directions**

Apply uniformly through suitable, calibrated commercial application equipment.

This product is a selective pre-emergence herbicide that, when properly applied, will control certain grass and broadleaf weeds in established turf grass and lawns. The maximum amount of this product that may be applied per year is given for each turf grass species in the Maximum Annual Rates section of this label.

At effective weed control in turf grasses will be obtained when this product is activated by at least 0.5 inch of rainfall or irrigation prior to weed seed germination and within 14 days following application. See the map below for approximate crabgrass seed germination dates.

**Use Precautions**

The following use precautions apply to the use of this product in turf grasses and lawns: Application of this product may thin emerged annual bluegrass and newly over-seeded grasses.

Do not apply to overseeded turf for 60 days after seeding or until after the second mowing, whichever ever is longer. Injury to desirable seedlings is likely if this product is applied before seeding secondary roots are in the second inch of soil, not thatch plus soil. Do not treated sod before 120 days after application. Do not apply to newly set sod until the following year.

Application of this product to turf stressed by drought, low fertility, or peat damage may result in turf injury. Disturbing the herbicide barrier with cultural practices such as diking may result in reduced weed control. Do not apply this product to putting greens or areas where dichondra, colonial bentgrass, velvet bentgrass or annual bluegrass (Poa annua) are desirable species.

**Rates of Application**

This product may be applied as a single application or in sequential applications to control weeds germinating throughout the year. All applications must be made prior to germination of the target weeds. This product will not control established weeds. Maximum use rate selection should be based on turf species. The length of time of residual weed control provided by this product is related to the rate applied.

**Maximum Annual Rates**

This product is recommended for use on the turf grass species listed in the following table. Do not exceed the maximum yearly rate as given in the following table.

Turf Species:	lb. Lesco Fertilizer with 0.43% Barricade / Acre	lb. a.i. per A.
Bermudagrass <sup>2</sup> Bahiagrass Centipedegrass Seashore Paspalum St. Augustinegrass Tall Fescue (including turf-type) Zoysia	340 lbs./A. (= 8.01 lbs./1,000 sq.ft.)	1.5# / Acre
Buffalograss Kentucky Bluegrass Perennial Ryegrass	233 lbs./A. (= 5.84 lbs./1,000 sq.ft.)	1.0# / Acre
Creeping Red Fescue Creeping Bentgrass	178 lbs./A. (= 4.42 lbs./1,000 sq.ft.) 160 lbs./A. (= 3.98 lbs./1,000 sq.ft.)	0.75# / Acre 0.65# / Acre

- These are the maximum rates per calendar year by species limitations.
  - May be used on newly sprigged or plugged Bermudagrass at rate not to exceed 121 lbs./Acre. Newly sprigged or plugged Bermudagrass stolon rooting may be temporarily retarded. Application only of Pectin, Goosegrass and Rescuegrass due to reduced product rates used in sprigging situations.
  - Use at an initial rate of 178 to 233 lbs./acre per application followed by sequential applications at doses that would not exceed the maximum annual application rate of 340 lbs./acre/year.
- Do not apply more than 340 lbs. of this product per calendar year. Use the higher rates of this product to achieve higher levels of fertility and weed control for each turf species.

**NOTIFICATION**

Lesco, Inc. 2005 Lake Road - Rocky River, OH 44116

MAY 06 2003

...seedling secondary roots are in the second inch of soil, not thatch plus soil.

**WHEN TO OVERSEED AFTER APPLICATION**

Barricade will inhibit the germination of turf species if overseeded too soon after application. Follow rates and intervals in the table below for best overseeding/reseeding results.

Product	a.i.	North	Transition	South
116 lbs./A	0.50	4 months	4 months	4 months
150 lbs./A	0.65	5 months	4 months	4 months
178 lbs./A	0.75	6 months	5 months	5 months
185 lbs./A	0.80	-	6 months	6 months
233 lbs./A	1.00	-	7 months	7 months
265 lbs./A	1.14	-	-	9 months
302 lbs./A	1.30	-	-	10 months

**LANDSCAPE ORNAMENTALS**

(Including Established Perennial and Wildflower Plantings)  
This product may be applied for residual pre-emergence weed control in ornamentals.

**Use Rates:** Apply this product at 150 to 340 lbs./A in fall and/or spring. Use the higher rates of application for longer control periods. Sequential or single applications are allowed so long as the total amount of product applied does not exceed the maximum annual application rate of 349 pounds, per acre, per year.

**Application Timing and Information**

This product may be applied to newly transplanted and established ornamentals as a broadcast, over the top or directed application. Irrigation or rainfall soon after application will wash residues off plant foliage and activate this product in the soil. This product may be applied at any time to established plants. Delay application to allow soil to settle around new transplants and water thoroughly before applying this product. Apply this product after cuttings form roots and become established. Apply before budding/grafting or after buds/grafts have taken to avoid any inhibition of the tissue union. This product is a pre-emergence herbicide and will not control emerged weeds. Most effective weed control in ornamentals will be obtained when this product is activated by at least 0.5 inch of rainfall or irrigation, or with shallow (1 to 2 inch) mechanical incorporation, prior to weed seed germination and within 14 days following application. Best weed control is obtained when this product is applied to soil free of clods, weeds, and debris such as leaves. Prior to application of this product, control existing vegetation by hand weeding, cultivation or the use of an appropriate post-emergence herbicide.

**Tolerant Ornamental Species**

This product will not harm most established ornamental trees, shrubs and flowers. The species listed below are tolerant to this product. Best results will be obtained when this product is uniformly applied to the soil surface; avoid applying to ornamental shoots which may defeat the effort to get uniform distribution on the soil surface. This product may be applied over the top of these species without injury.

\*Ornamental species only. Do not use on food producing trees or shrubs. \*\*For use on landscape ornamentals only.

**LIMITATION OF WARRANTY AND LIMITATION OF LIABILITY**

NOTICE: Read this Limitation of Warranty and Limitation of Liability before buying or using this product. The limitations are not acceptable, return the product at once, unopened, and the purchase price will be refunded. It is impossible to eliminate all risks inherently associated with the use of this product. Crop failure, insect/disease, or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of the manufacturer or seller. All such risks shall be assumed by buyer or user. The manufacturer warrants that this product conforms to the chemical description on the label and will perform for the purposes stated in the Directions for Use, under normal use conditions, subject to the risks described above. THE MANUFACTURER MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR OF MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY. In no event shall the manufacturer or seller be liable for any incidental, consequential or special damages resulting from the use or handling of this product. The manufacturer and seller offer this product, and buyer and user accept it, subject to the foregoing limitations of warranty and limitation of liability, which may not be modified by any oral or written agreement. Dear Ms. Edwards:

Please find the enclosed the notifications of Alternate Brand Name for four LESCO products:

EPA Reg. No.	Alternate Brand Name #1	Alternate Brand Name #2
10404-88	LESCO Barricade® 0.20% Plus Fertilizer	LESCO Stonewall® 0.20% Plus Fertilizer
10404-89	LESCO Barricade® 0.43% Plus Fertilizer	LESCO Stonewall® 0.43% Plus Fertilizer
10404-90	LESCO Barricade® 0.68% Plus Fertilizer	LESCO Stonewall® 0.68% Plus Fertilizer
10404-91	LESCO Barricade® 2.0% Plus Fertilizer	LESCO Stonewall® 2.0% Plus Fertilizer

Please do not hesitate to contact me with any questions or concerns you may have when reviewing this notification. Thank you for your assistance on this matter.

Best regards,

Gloria M. Sieloff, Ph.D.  
Director, Corporate Quality Assurance and Regulatory Affairs
