or doctor or going for treatment. You may also contact Chem-Trec at 1-800-424-9300 for emergency medical treatment information.

#### PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Causes moderate eye injury (irritation). Harmful if inhaled or absorbed through the skin. Avoid contact with skin, eyes, or clothing. Avoid breathing dust. Wash thoroughly with scap and water after handling. Protonged or frequently repeated skin contact while handling the material may cause allergic reactions in some individuals.

### **ENVIRONMENTAL HAZARDS**

This product has low solubility in water. At the limits of solubility, this product is not toxic to fish. However, at concentrations above the level of water solubility, it may be toxic to fish. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to aquatic organisms in adjacent sites. Do not contaminate water when disposing of equipment washwaters.

# STORAGE AND DISPOSAL

STORAGE: Store this product only in its original container in a dry, cool, secured storage area. Do not contaminate water, foodstuffs, feed or seed by storage or disposal.

PRODUCT DISPOSAL: Wastes resulting from the use of this product that cannot be used or chemically reprocessed should be disposed of in a landfill approved for pesticide disposal or in accordance with applicable Federal, State or local procedures. Or call [1-800-CLEANUP] for disposal instructions. Never place unused product down any indoor or outdoor drain.

EMPTY CONTAINER DISPOSAL: Do not reuse bag. Dispose of emptied bag(s) in a sanitary landfill approved for pesticide disposal, or by incineration. SPILL: In case of spill, sweep up material and dispose of material according to "product disposal" directions listed above.

#### DIRECTIONS FOR USE

- It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.
- This product is a selective pre-emergence herbicide that provides residual control of many grass and broadleaf weeds in established turf grasses (excluding golf course putting greens) and lawns; landscape ornamentals; and established perennials & wildflower plantings. This product controls susceptible weeds by inhibiting weed seed germination and root development. Most effective weed control will be obtained when this product is activated by at least 0.5 inch of rainfall or irrigation prior to weed seed
- germination and within 14 days following application. Not for use on plants being grown (1) for sale or other commercial use, (2) for Not for use on plants being grown (1) for sale or other commercial use, (2) for commercial seed production, or (3) for research purposes. For use on plants intended for aesthetic purposes or climatic modification and being grown in ornamental gardens or parks, or on golf courses or lawns and grounds.
- Do not graze or feed livestock forage cut from areas treated with this product.
- Do not apply this product through any type of irrigation system.
- Do not apply aerially.
- Do not apply to golf course putting greens
- **USE PRECAUTIONS**
- The following use precautions apply to the use of this product in turf grasses and lawns: - Application of this product may thin emerged annual bluegrass and newly over-seeded grasses.
- Do not apply to overseeded turf for 60 days after seeding or until after the second mowing, which ever is longer. Injury to desirable seedlings is likely if this product is applied before seedling secondary roots are in the second inch of soil, not thatch plus soil.
- Do not cut treated sod before 120 days after application. Do not apply to newly set sod until the following year.
- Application of this product to turf stressed by drought, low fertility, or pest damage may result in turf injury.
- Disturbing the herbicide barrier with cultural practices such as disking may result in reduced weed control.
- Do not apply this product to putting greens or areas where dichondra, colonial bentgrass, velvet bentgrass or annual bluegrass (Poa annua) are desirable species.

### **APPLICATION DIRECTIONS**

Apply uniformly through suitable, calibrated commercial application equipment. ESTABLISHED TURF

This product is a selective pre-emergence herbicide that, when properly applied, will control certain grass and broadleaf weeds in established turf grass and lawns. The maximum amount of this product that may be applied per year is given for each turf grass species in the Maximum Annual Rates section of this label.

Most effective weed control in turf grasses will be obtained when this product is activated by at least 0.5 inch of rainfall or irrigation prior to weed seed germination and within 14 days following application. See the information below for approximate crabgrass seed germination dates.

## RATES OF APPLICATION

This product may be applied as a single application or in sequential applications to control weeds germinating throughout the year. All applications must be made prior to germination of the target weeds. This product will not control established weeds. Maximum use rate selection should be based on turf species. The length of time of residual weed control provided by this product is related to the rate applied.

### MAXIMUM ANNUAL RATES

This product is recommended for use on the turf grass species listed below. Do not exceed the maximum yearly rate:

	m Application Rate per Calendar-Year	
Turf Species	Ib LESCO Stonewall 0.68% Plus 🕌 I Fertilizer / acre	b Al per Acre
Bermudagrass <sup>2</sup> Bahiagrass Centipedegrass Seashore Paspalum St. Augustinegrass <sup>3</sup> Tall Fescue (including turf-type) Zoysia	220 lb/acre (5.05 lb/1,000 sq ft)	1.5
Buffalograss Kentucky Bluegrass Perennial Ryegrass	147 lb/acre (3:37 lb/1,000 sq ft)	1.0
Creeping Red Fescue	110 lb/acre (2.52 lb/1,000 sq ft)	0.75
Creeping Bentgrass	95 lb/acre (2.18 lb/1,000 sq ft) • •	0.65

These are the maximum rates per calendar year by species limitations.

- May be used on newly sprigged or plugged Bermudagrass at rates not to exceed 2. 121 Ib/Acre. Newly sprigged or plugged Bermudagrass stolon rooting may be temporarily retarded. Suppression only of Foxtail, Goosegrass, and Rescuegrass due to reduced product rates used in sprigging situations.
- Use at an initial rate of 110 to 147 Ib/acre per application followed by sequential applications at doses that would not exceed the maximum annual application rate of 220 lb/acre/year.

Do not apply more than 220 lb of this product per acre per calendar year.

Use the higher rates of this product to achieve higher levels of fertility and weed control for each turf type.

## **APPLICATION TIMING AND INFORMATION**

This product may be applied to newly transplanted and established ornamentals as a broadcast, over the top, or directed application. Imigation or rainfall soon after application will wash residues off plant foliage and activate this product in the soil. This product may be applied at any time to established plants. Delay application to allow soil to settle around new transplants and water thoroughly before applying this product. Apply this product after cuttings form roots and become established. Apply before budding/grafting or after buds/grafts have taken to avoid any inhibition of the tissue union. This product is a pre-emergence herbicide and will not control emerged weeds. Most effective weed control in nerbicide and wir hot control emerged weeds. Most enective weed control in ornamentals will be obtained when this product is activated by at least 0.5 inch of rainfall or irrigation, or with shallow (1 to 2 inch) mechanical incorporation, prior to weed seed germination and within 14 days following application. Best weed control is obtained when this product is applied to soil free of clods, weeds, and debris such as leaves. Prior to application of this product, control existing vegetation by hand-weeding, cultivation, or the use of an appropriate postemergence herbicide.

## TOLERANT ORNAMENTAL SPECIES

This product will not harm most established ornamental trees, shrubs, and flowers. The species listed below are tolerant to this product. Best results will be obtained when this product is uniformly applied to the soil surface; avoid applying to ornamental shoots which may defeat the effort to get uniform distribution on the soil surface. This product may be applied over the top of these species without injury.

Foxtails, Annual	Lambsquarter, Common	Signalgrass, Broadleaf	

- In many areas a single application of 33 to 75 lb/acre of this product will In many areas a single application of 33 to 75 ib/acre of this product will control the above listed weeds and gooesgrass. However, under heavy goosegrass pressure and/or an extended growing season, most effective weed control can be obtained by making an initial application of 33 to 50 ib/acre followed after 60 to 90 days by a second application at doses that would not exceed those given in the Maximum Annual Rate Table. Do not exceed the maximum rate for turf grass species listed in the Maximum Annual Rate Table above.
- Suppression only. Sequential applications may be made so long as the total amount of product applied does not exceed the maximum annual application rates recommended for each turf species. All applications must be made prior to germination of weed seeds.
- Applications for this weed should be made in late summer, fall or winter prior to germination.

### WHEN TO APPLY AFTER OVERSEEDING

Do not apply to overseeded turf within 60 days after seeding or until after the second mowing, whichever is longer. Injury to desirable seedlings is likely if this product is applied before seedling secondary roots are in the second inch of soil, not thatch plus soil.

## WHEN TO OVERSEED AFTER APPLICATION

This product will inhibit the germination of turf species if overseeded too soon after application. Follow rates and intervals in the table below for best overseeding/reseeding results.

LESCO Stonewall 2.0% Plus Fertilizer Rate (Ib/Acre)		Interval Before Overseeding		seeding
Product	AI	North	Transition	South
25 lb/acre	0.50 lb/acre	4 months	4 months	4 months
33 lb/acre	0.66 lb/acre	5 months	4 months	4 months
37 lb/acre	0.74 lb/acre	6 months	5 months	5 months
40 lb/acre	0.80 lb/acre		6 months	6 months
50 lb/acre	1.00 lb/acre	-	7 months	7 months
57 lb/acre	1.14 lb/acre	-	-	9 months
65 lb/acre	1.30 lb/acre	-	-	10 months

## ANDSCAPE ORNAMENTALS

(Including Established Perennial and Wildflower Plantings) This product may be applied for residual pre-emergence weed control in ornamentals.

Use Rates - Apply this product at 33 to 75 lb/acre in fail and/or spring. Use the higher rates of application for longer control periods. Sequential or single applications are allowed so long as the total amount of product applied does not exceed the maximum annual application rate of 75 pounds, per acre, per year.

Dear Ms. Miller:

Notifications are being submitted for your review and acceptance to address the following:

- Addition to Optional/Marketing statements:
  - Contains LESCO® Poly Plus® Sulfur Coated Urea to provide uniform growth with extended nitrogen feeding."
- Clarification of 'Derived From' statement in the Guaranteed (Fertilizer) Analysis box:
   "Slowly Available Urea Nitrogen from Polymer Coated sulfur Coated Urea"
  - Clarification of 'Poly Plus' composition in the Trademarks section:
  - o "Poly Plus is comprised of Polymer Coated sulfur Coated Urea"

The following documentation is provided in support of the above:

- 8570-1: Notification request form for each EPA registration number
- One (1) highlighted label of each EPA registration noting the above items
- Five (5) copies of the clean label for each EPA registration

If you have any questions, or further clarification is required, please feel free to contact me at <u>sspencer@lesco.com</u> or 1-216-706-9250 ext 2343.

Thank you for your assistance on this matter.

Sincerely,

٠

St Apenen
