

USDA REG. NO. 10422-1

WALLER I

An inorganic insecticide wettable powder for CONTROL OF COCKROACHES
NOT FOR FOOD OR DRUG USE

Active Ingredient:

Boric Acid (Orthoboric Acid) 99%

Inert Ingredient 1%

★ CAUTION ★

KEEP OUT OF REACH OF CHILDREN

- * Keep containers and residue free from internal use by children and animals.
- * Avoid contamination of food and foodstuffs.
- * Capable of destroying plant life and vegetable roots.
- * Dust only areas inaccessible to children and pets.
- * Any powder visible after treatment should be brushed into cracks and crevices or otherwise be removed.

DIRECTIONS FOR USE

WALLER I is a non volatile inorganic borane, white, free flowing wettable powder, odorless, non-staining. Designed for use in homes, apartments, restaurants, office buildings, hotels, hospitals, warehouses, industrial plants. Also because it is non-volatile, WALLER I will remain continuously active and effective for long periods of time. Sprinkle dust or spray into cracks and crevices, dark and damp areas. For large structures, use proportionately larger quantities of powder to provide long lasting COCKROACH CONTACT.

DESTROY CONTAINER WHEN EMPTY
