**PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS**

**DANGER!**

Causes severe eye and skin damage.  
Do not get in eyes, on skin, or on clothing  
Wear goggles or face shield and rubber gloves when handling  
Harmful or fatal if swallowed  
Avoid contamination of food  
Corrective

**FIRST AID:** In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution; or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

**NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression, and convulsion may be needed.

**ENVIRONMENTAL HAZARDS**

This product is toxic to fish. Do not discharge effluent containing this active ingredient into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

**H-130 Water Treatment Microbiocide**

Will control algae and bacterial slimes found in recirculating cooling tower waters. Helps clean and loosen slime debris from cooling system surfaces.

Is economical to use because it is concentrated. It should be handled with care.

**NOTICE:** Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such and/or handling is contrary to the label instruction.

**DIRECTIONS I**

It is a violation of Federal law to use this product with its labeling.

**Method of Feeding**  
H-130 should be fed as received if prepared in a pail. If product is slug-fed by hand, a biocide. Prepare mixture by slowly add preparation procedure minimizes processing and when feeding the diluted. Apply at a point in the system where the **Feed Requirements**

Badly fouled systems must be cleaned for best results. H-130 should be fed inter **Continuous Feed Method**  
**INITIAL DOSE:** When the system is ounces of H-130 per thousand gallons  
**SUBSEQUENT DOSE:** Maintain treatment feed of 0.15 to 1.5 fluid ounces of H-130 water (1-10 ppm).

**Intermittent or Slug Feed Method**  
**INITIAL DOSE:** When the system is no ounces of H-130 per thousand gallons. If the dosage does not produce satisfactory results, 10.5 fluid ounces of H-130 per thousand gallons. Typically an antifoam is required to dosages of H-130 are required to achieve. After optimum treatment has been determined, increase frequency as required.

**SUBSEQUENT DOSE:** When microbicides are used, 1 fluid ounce of H-130 per thousand gallons or as needed to maintain control (15-20 ppm).

**STORAGE AND DISPOSAL**

**Prohibitions** — Do not store near heat or open flame or food or feed by storage or disposal

**Pesticide Disposal** — Pesticide wastes are of excess pesticide, spray mixture, or rinsate. Wastes cannot be disposed of by use according to State Pesticide or Environmental Control Act. Representative at the nearest EPA Regional Office.

**Metal Containers** — Triple rinse (or equivalent) and dispose of according to approved State and local procedures

**Plastic Containers** — Triple rinse (or equivalent) and dispose of if allowed by State and local authorities, by incineration.

**Tank Cleaning** — Transport tanks and equipment and flushed with water to properly remove washings as indicated above under Pesticide Disposal. Wastes are hazardous.

Not Reviewed. Registrant claims to be in accordance with registration of Pesticide Product Guidance for Phase 2 response, Page 2.12, Active to Inert Change in Status.
