ACCEPTED

ENPROAL FLY CONTROL SUPPLEMENT

APR 10 1981
Under the Federal Insecticide,
Fungicide, and Rodenticide Act
as amended. This product
is registered under
EPA Reg. No. 10461-A

Aids in preventing the breeding of horn flies and face
flies in the manure of treated cattle, when used as in-
structed.

Pesticidally Active Ingredient
Phenothiazine 0.41%
Inert* Ingredient 99.59%
Total 100.00%

*Refers only to ingredients which are not
pesticides.

GUARANTEED ANALYSIS:

Crude Protein, minimum	5.00%
Crude Fat, minimum	0.20%
Crude Fiber, maximum	2.00%
Calcium (Ca), maximum	0.95%
Calcium (Ca), minimum	0.75%
Phosphorus (P), minimum	0.55%
Magnesium (Mg), minimum	3.75%
Salt (NaCl), maximum	19.00%
Salt (NaCl), minimum	17.00%
Potassium (K), minimum	2.50%
Fluorine (F), maximum	0.002%
Invert Sugars, minimum	40.00%
Vitamin A, minimum	60,000 USP Units
Vitamin D-3, minimum	20,000 USP Units

FEED INGREDIENTS:

Molasses, Salt, Magnesium Oxide, Rice Mill Feed, Corn Fermentation Solubles, Defluorinated
Phosphate, Sulfur Iron Oxide, Iron Sulfate, Zinc Oxide, Zinc Sulfate, Manganese Sulfate, Man-
ganous Oxide, Copper Sulfate, Ethylenediamine dihydroiodide, Cobalt Sulfate, Cobalt Carbonate,
Mineral Oil, Vitamin A Acetate and D-Activated Sterol (source of Vitamin D-3).

KEEP OUT OF REACH OF CHILDREN

CAUTION

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS & DOMESTIC ANIMALS

Harmful if swallowed. Avoid contact with skin and eyes. Wash thoroughly with soap and
water after handling and before eating or smoking. If in eyes, wash with plenty of water for
15 minutes. If irritation persists, see a physician.

Do not use for lactating dairy animals. Occasional sensitivity to phenothiazine has been re-
ported in cattle. Do not administer to animals showing symptoms of acute respiratory con-
ditions.

ENVIRONMENTAL HAZARDS

Keep out of lakes, streams or ponds. Do not contaminate water by disposal of waste. Apply
this product as specified on the label.

DIRECTIONS FOR USE

It is in violation of Federal law to use this product in a manner inconsistent with its labeling.
Self-feed ENPROAL Fly Control Supplement as the sole source of salt to cattle. Locate units
near cattle watering areas and loafing areas. Maintain adequate ENPROAL units at all times
to assure consistent intake. Feed at the rate of 5 ENPROAL units for every 25 head of cattle.
When a unit is 3/4 consumed add an additional unit. Adult cattle must consume 1 pound of
ENPROAL unit per head per day in order for cattle to consume the 2 grams of phenothiazine
intended. Younger cattle must consume 2 ounces per 100 pounds of body weight per head per
day to receive the 0.25 grams of phenothiazine intended.

Cattle should be given access to ENPROAL Fly Control Supplement for several weeks prior
to the appearance of adult horn flies in the spring, and should be fed the supplement contin-
uously until flies disappear in the fall. ENPROAL Fly Control Supplement helps prevent the
breeding of horn flies and face flies but has no effect upon existing adult fly populations.
Since horn flies overwinter in the pupal state, all cattle should be sprayed when the flies first
appear. Spraying kills the flies emerging from last year's pupae and will protect cattle for
about two weeks until ENPROAL Fly Control Supplement can take effect. Since face flies
move later from farm to farm it is essential that the flyicide program be carried out on an area
basis to assist in the reduction of the adult face fly population.

STORAGE AND DISPOSAL

PROHIBITIONS

Do not contaminate water, food or feed by storage or deposit. Open dumping is prohibited.

PESTICIDE DISPOSAL

Pesticide that cannot be used should be disposed of in a tank approved for pesticides or
buried in a safe place away from water supplies.

CONTAINER DISPOSAL

Dispose of in an incinerator or landfill permitted for the disposal of dairy equipment in a safe
place.

GENERAL

Consult federal, state or local department of agriculture for specific disposal procedures, such as
burned open burning.
