PC-55 ALGAECIDE

Containing *Hyamine 3500
HYAMINE is a trade mark Reg. U. S. Pat. Off. and in principal foreign countries by Rohm and Haas Company.

ACTIVE INGREDIENTS
n-Alkyl (50% C₁₂, 40% C₁₄, 10% C₁₆ dimethyl benzyl ammonium chloride 10%
INERT INGREDIENTS
Water and ethanol 90%
USDA Registration No. 10498-1

PREFERRED CHEMICALS for Industry!
Net Contents 1 Gallon

CAUTION
KEEP OUT OF REACH OF CHILDREN. Undiluted PC-55 Swimming Pool Algaecide concentrate may cause skin irritation or damage to the eyes. Harmful if swallowed. Avoid contact with skin and eyes. Do not take internally. In case of contact with skin or eyes, flush immediately with plenty of water. For eyes, flush immediately with plenty of water and get immediate medical attention. Avoid contamination of food.

MANUFACTURED BY WHITE CHEMICAL CO.

Houston, Texas **Net Contents 1 Gallon**
The presence of algae in outdoor swimming pools is objectionable because of the color, cloudiness, odor, and increased chlorine demand of the water. The use of PC-55 Algaecide will help to maintain the water in a clean condition. PC-55 Algaecide is compatible with the usual water treatment chemicals. By controlling algae growth with PC-55 Algaecide, the chlorine demand of the pool may be significantly reduced.

DIRECTIONS

1. In freshly filled pools or pools showing no visible algae growth add one gallon PC-55 Algaecide per 50,000 gallons of water to prevent algae growth.
2. If algae growth is observed, add one gallon PC-55 Algaecide for each 20,000 gallons of water to kill and control those algae species most commonly found in swimming pools. When existing growth is dead, clean the pool, drain and refill if necessary, and add one gallon PC-55 Algaecide per 50,000 gallons of water.
3. If the pool water treated as in (1) or (2) is recycled, add one gallon of PC-55 Algaecide per 50,000 gallons of water every five to seven days to maintain between two and five parts per million of active ingredient. See servicemen for test kit.
4. If the pool water treated as in (1) or (2) above is not recycled or not filtered it should be tested periodically to determine the active ingredient content. When necessary, one gallon PC-55 Algaecide per 50,000 gallons of water should be added to maintain two to five parts per million of active ingredient.
