

DIRECTIONS FOR USE

DAIRY FARMS AND PLANTS • All equipment must be clean before sanitizing. Use recommended Chemidyne detergents and procedures. Sanitize all equipment and utensils with CD-610—just prior to use. Solution should contain 200 ppm available chlorine. Minimum contact time between CD-610 solution and equipment should be 2 minutes. Do not soak utensils in CD-610 solution overnight.

FOOD PROCESSING PLANTS • Effective sanitizer for all types of food processing equipment. Solutions of CD-610 may be applied by brush, spray, circulation or soaking. 200 ppm available chlorine solution with a 2 minute minimum contact time is recommended.

BEVERAGE PLANTS AND BREWERIES • Efficient sanitizer for vats, lines, tanks, fillers, etc. CD-610 provides the bacteriological control needed in modern plants. 200 ppm available chlorine solution with a 2 minute minimum contact time is recommended.

DEODORIZING AND DISINFECTING • Brush, rinse, or spray equipment or rooms with CD-610 solution. 5 ounces of CD-610 in 2 gallons of water will give 600 ppm available chlorine. After treatment with 600 ppm available chlorine solution, rinse with a 200 ppm available chlorine solution.

MOLD CONTAMINATION • Wash, brush, and sanitize surfaces using CD-610 solution at 600 to 1200 ppm available chlorine. After treatment with this solution, rinse surfaces with a 200 ppm available chlorine solution.

NET WEIGHT 300 LBS.

CHEMIDYNE CORP.

ACTIVE INGREDIENTS

Sodium Hypochlorite over 3.25%
Sodium Phosphate
expressed as
Na₂PO₄ • 12H₂O over 91.75%

INERT INGREDIENTS

Sodium Chloride under 5.00%

TOTAL 100.00%

THE MULTI-PURPOSE SANITIZER

CD-610

DEODORANT • BACTERICIDE • GERMICIDE • DISINFECTANT

DANGER

KEEP OUT OF REACH OF CHILDREN.
See other warnings on side panel.

FREIGHT CLASSIFICATION: Cleaning and Washing; Compound NO1BN.

USDA Reg. No. 10508-3

NET WEIGHT 300 LBS.

CAUTION: Harmful if swallowed. May cause burns or damage to the eyes. Do not get on skin or in eyes. If contact with eyes occurs, flush with plenty of water for 15 minutes and get medical attention. If contact with skin occurs, flush with water. Avoid contamination of food.

All local, state, and federal regulations regarding the concentration of available chlorine required should be followed. Local health authorities should be contacted if doubt exists.

Maximum concentration recommended for final rinsing prior to processing food is 200 ppm available chlorine.

| MIXING OR DILUTION TABLE | PARTS PER MILLION OF CHLORINE (ppm) | OUNCES PER GALLON OF WATER | LEVEL TABLESPOONS PER GALLON OF WATER |
