## **Preparation of Use Concentrations**

- 1. Sanitizing by immersion, circulation, brush or pad application: Add
- I ounce (2 level tablespoonfuls) of CD-640 Anionic Acid Sanitizer to 6 gallons of water. This solution contains 200 parts per million (ppm) of the active ingredient, dodecylbenzene sulfonic acid.
- 2. Sanitizing by spray ap ication: Add 1 ounce (2 level table-spoonfuls) of CD-640 Anionic Acid Sanitizer to 3 gallons of water. This solution contains 400 parts per million (ppm) of the active ingredient, dodecylbenzene sulfonic acid.

## Attention:

The use concentration of the sanitizer must not contain over 400 ppm of the active ingredient, dodecylbenzene sulfonic acid. Under no circumstances should the solution be stronger than 1 ounce per 3 gallons of water. CD-640 Anionic Acid Sanitizer is a highly concentrated product and is much heavier than water. The use dilutions recommended for less concentrated products are not applicable, as active ingredient concentration could then exceed the legal limit.

CD-640 Anionic Acid Sanitizer when used as directed fulfills the criteria of Appendix F of the Grade "A" Pasteurized Milk Ordinance 1965 Recommendations of the U. S. Public Health Service in waters up to 500 ppm (29 grains per gallon) of hardness calculated as CaCO3.

**DANGER:** Do not get in eyes, on skin or on clothing. Causes severe eye and skin damage. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal when swallowed. Avoid contamination of food. Avoid inhalation of spray mist.

**FIRST AID:** In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. If swallowed, do not induce vomiting, drink large quantities of fluid and call a physician immediately.

KEEP FROM FREEZING

Net Contents - ONE U. S. GALLON

ACTIVE INGREDIENTS:

Phosphoric acid

Dodecylbenzene sulfonic acid

INERT INGREDIENTS:

46.8% 12.1%

41.1%
