### DIRECTIONS

#### Louse And Horn Fly Control

Suspend CATTLE DUST™ BAG in areas frequented by cattle in gateways or lanes through which the animals pass daily for water, feed or minerals. Bags may also be suspended in loafing sheds or in front of protected mineral feeders. For lactating dairy cows, CATTLE DUST™ BAG may be suspended in the exit through which cows leave the milking parlors. In all cases, the bags should be hung from the top of the structure four to six inches below the top edge of the eave.

#### INSTALLATION OF CATTLE DUST™ BAG

Suspend the bags by inserting the bag into the grommets on the side of the bag and attaching them to the structure. Hang the grommets into hooks fixed to the structure. Use the recommended for more details.

Installation of CATTLE DUST™ BAG should be done in a well-ventilated area. Do not breathe the dust. Wash face and eyes after use. Do not get dust in eyes. Do not get dust on clothing. Do not get dust on skin. Do not get dust on food. Do not get dust on feed. Do not get dust on water. Do not get dust on equipment. Do not get dust on anything else.

#### KEEP OUT OF REACH OF CHILDREN

For more information, contact your local distributor.
