DIRECTIONS

BEEF AND DAIRY CATTLE To protect them from **horn flies, house flies, mosquitoes, and gnats**, apply a spray mist sufficient to wet the top of the hair. To control **stable flies, horse flies, deer flies**, apply 3 ounces per animal or mist sufficient to wet the hair but not to soak the hide. Repeat treatment once or twice daily or at intervals necessary to give continued protection.

To control **blood-sucking lice** apply the spray lightly to infested areas using a stiff brush to get the spray to the base of the hair. Use 2 ounces per foot per animal. Repeat every two or three weeks as required.

BARN, MILK ROOMS, DAIRY PLANTS To control **flies, mosquitoes and gnats**, apply a spray mist to the top of the hair of the animals and to the walls and ceiling of the barn, milk room, and dairy plant. Repeat treatment once or twice daily or at intervals necessary to give continued protection.

To control **house flies, stable flies, horse flies, deer flies, mosquitoes, and gnats**, apply a spray mist to the walls and ceiling of the barn, milk room, and dairy plant. Repeat treatment once or twice daily or at intervals necessary to give continued protection.
