Vasco Pool Protector

Prevents Swimming Pool Algae
Keeps Pool Water Clear and Free of Vicious Algae
Controls Algae Spores

ACTIVE INGREDIENTS

1. 2,4-Dichlorophenoxyacetic acid, 2,4-dichlorophenyl ester 50%
2. 2,4-Dichlorophenoxyacetic acid, 2,4-dichlorophenyl ester 50%
3. 2,4-Dichlorophenoxyacetic acid, 2,4-dichlorophenyl ester 50%

INERT INGREDIENTS

1. 2,4-Dichlorophenoxyacetic acid, 2,4-dichlorophenyl ester 50%
2. 2,4-Dichlorophenoxyacetic acid, 2,4-dichlorophenyl ester 50%
3. 2,4-Dichlorophenoxyacetic acid, 2,4-dichlorophenyl ester 50%

DANGER Keep Out of Reach of Children

See other precautions and first aid statements on side panel

Warning: This product is toxic to fish. Do not use in swimming pools or other bodies of water where fish are kept. Do not use in ponds or lakes where fish are kept. Do not use in streams or rivers where fish are kept. Do not use in any body of water where fish are kept.

DANGER

Keep out of reach of children. Do not use in swimming pools or other bodies of water where fish are kept. Do not use in ponds or lakes where fish are kept. Do not use in streams or rivers where fish are kept. Do not use in any body of water where fish are kept.

This product is toxic to fish. Do not use in swimming pools or other bodies of water where fish are kept. Do not use in ponds or lakes where fish are kept. Do not use in streams or rivers where fish are kept. Do not use in any body of water where fish are kept.

FIRST AID

Do not breathe dust. If inhaled, get fresh air. If swallowed, do not induce vomiting. If on skin, wash with soap and water. If in eyes, flush with water for 15 minutes. If in mouth, spit out and wash mouth with water. If on clothing, remove clothing and wash with soap and water.

NOTE TO PHYSICIAN

Preventive treatment of swimming pools and other bodies of water where fish are kept. Do not use in ponds or lakes where fish are kept. Do not use in streams or rivers where fish are kept. Do not use in any body of water where fish are kept.

SENTRY

DANGER

KEEP OUT OF REACH OF CHILDREN

Corrosive. Causes eye damage and skin irritation. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

FIRST AID

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

NET CONTENTS

AL-JAX SWIMMING POOL ALGAECIDE

ACTIVE INGREDIENTS:

n-Alkyl 50% C11, 40% C12, 10% C13
dimethyl benzyl ammonium chloride 10%

INERT INGREDIENTS:

Water and ethanol 90%

U.S.D.A. Registration No. 10663-5

The presence of algae in outdoor swimming pools is objectionable because of the color, cloudiness, odor, and increased chlorine demand of the water. The use of AL-JAX Algaecide will help to maintain the water in a clean condition.

AL-JAX Algaecide is compatible with the usual water treatment chemicals. By controlling algae growth with AL-JAX Algaecide, the chlorine demand of the pool may be significantly reduced.

This product is toxic to fish. Do not discharge treated effluent into lakes, streams or ponds. Rinse empty container thoroughly with water and discard it.

Manufactured By

DIRECTIONS

1. In freshly filled pools showing no visible algae growth add one gallon AL-JAX Algaecide per 50,000 gallons of water to prevent algae growth.
2. If algae growth is observed, add one gallon AL-JAX Algaecide for each 20,000 gallons of water to kill and control those algae species most commonly found in swimming pools. When existing growth is dead, clean the pool, drain and refill if necessary, and add one gallon AL-JAX Algaecide per 50,000 gallons of water.
3. If the pool water treated as in (1) or (2) is recycled, add one gallon of AL-JAX Algaecide per 50,000 gallons of water every five to seven days to maintain between two and five parts per million active ingredient. See serviceman for test kit.
4. If the pool water treated as in (1) or (2) above is not recycled or not filtered it should be tested periodically to determine the active ingredient content. When necessary, one gallon AL-JAX Algaecide per 50,000 gallons of water should be added to maintain two to five parts per million of active ingredient.
