

US ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (TS-767) WASHINGTON, DC 20460	EPA REGISTRATION NO.	DATE OF ISSUANCE
	10598-1	11/10/87
NOTICE OF PESTICIDE: <input type="checkbox"/> REGISTRATION <input checked="" type="checkbox"/> REREGISTRATION (Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended)	TERM OF ISSUANCE	
	NAME OF PESTICIDE PRODUCT	
Pool Doctor Dry Chlor		
NAME AND ADDRESS OF REGISTRANT (Include ZIP code)		
World Industries International, Inc. 17955 Arenth Avenue City of Industry, CA 91758		
NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.		
On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.		
A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.		
Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.		
Based on your response to the General Registration Standard - "Guidance for the Registration and Reregistration of Pesticide Products Containing Sodium or Calcium Hypochlorite as the Sole Active Ingredient"--issued February 1986 and revised April 1986, EPA has reregistered the product listed above in accordance with FIFRA section 3(g).		
Your amended label has been stamped approved and a copy is enclosed. You must incorporate any comments noted on your label. This label must be on products released for shipment within 1 year or by the next label printing, whichever occurs first. This label must also appear on all supplemental registrations within 1 year of this Notice of Reregistration or at the next label printing, whichever occurs first.		
Your product meets the criteria for reregistration under this Standard. Failure to comply with this Standard may result in the Agency's issuance of a Notice of Intent to Cancel the registration under FIFRA section 6(b)(1).

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND
DOMESTIC ANIMALS**

Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS:

This product is toxic to fish. Do not discharge into lakes, streams, ponds or public waters unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.

**PHYSICAL AND
CHEMICAL HAZARDS
STRONG OXIDIZING AGENT:**

Strong Oxidizing Agent. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

DRY CHLORINE

(CHLORINATING GRADE)
3 PRODUCTS
A REGULAR CHLORINE
AN ALGAEICIDE
A SHOCK TREATMENT

KEEP OUT OF REACH OF CHILDREN

PRACTICAL TREATMENT: Follow directions on container. Do not use in cooking or cooking oil. Call a physician.

IF ON SKIN: Brush off excess. Wash with water. If irritation persists, get medical attention.

IF IN EYES: Flush with water for 15 minutes. Get medical attention.

ACTIVE INGREDIENTS:

Calcium Hypochlorite

100%

DRY CHLOR

(CHLORINATING GRANULES)
3 PRODUCTS IN ONE
A REGULAR CHLORINATOR
AN ALGAEICIDE
A SHOCK TREATMENT

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling

1. Check residual chlorine with a Pool Doctor Test Kit. If below 1.0 ppm, add 10 ounces Pool Doctor Dry Chlor per 10,000 gallons. Repeat this dosage until a chlorine residual of 1.0-1.5 ppm has been established. Add Dry Chlor to water by broadcasting over pool surface, preferably at deep end and in the evening. An alternate method of addition, which results in less addition of calcium and other solids to pool water, is to mix 2 oz. product per gallon of water, allow to settle, and pour clear solution into pool. Do not add water to this container.
2. Maintain residual chlorine. If pool is not stabilized maintain 0.6-1.0 ppm residual chlorine; this will require approximately 6-8 ounces per 10,000 gallons every day. If the pool is stabilized add 2-3 ounces per 10,000 gallons every other day or as needed to maintain 1.0-1.5 ppm residual chlorine. (Two ounces of this product supply 1.0 ppm chlorine to 10,000 gallons.) Higher dosage may be required during exceptionally hot weather or when many people are using the pool. Stabilize pool with Pool Doctor Conditioner (Cyanuric Acid).
3. Pool Doctor Dry Chlor is also a strong algaeicide. For a pool with algae problems use 12-15 ounces of Pool Doctor Dry Chlor, for each 10,000 gallons of water. Remove settled algae and debris with Pool Doctor Algae Brush. Run the pump for 12 hours. Check the water; if needed repeat the process accordingly.
4. Superchlorination is necessary after a heavy bathing load, or approximately every 7-14 days when water temperature is 75°-95°F. Superchlorinate by adding 5 oz. product per 5,000 gallons of water.
5. Measure pH at least once each week with a Pool Doctor Test Kit. Adjust pH to 7.2-7.8 if necessary by adding Pool Doctor Liquid Acid* or Pool Doctor Dry Acid* to reduce pH, or Pool Doctor Soda Ash* to increase pH. *Follow Directions for Use on labels of these products.

STORAGE AND DISPOSAL

Keep product dry in tightly closed container when not in use. Store in a cool dry, well ventilated area away from heat or open flame. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area, ~~or bury in a safe place.~~ *delete*

World Industries International, Inc. warrants that this product is reasonably fit for intended use and that it contains the ingredients on the label in the specified amount. Since use conditions are beyond the control of World Industries International, Inc. our liability is limited to a replacement of the product without of the purchase price.

NOTE: This product is sold by weight. Settling of contents during storage and handling will occur.
