

POOL DOCTOR T S T

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Rinse and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS:

This product is toxic to fish. Do not discharge into lakes, streams, ponds or public waters unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS STRONG OXIDIZING AGENT:

Strong Oxidizing Agent. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reuse container. If possible, isolate container in open area, well ventilated area. Flood with large volumes of water if necessary.

STORAGE AND DISPOSAL:

Keep product dry in tightly closed container in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container if possible, and flood with large amounts of water to dissolve material before discarding. Place in trash collector or dispose in approved landfill area. Do not bury in a safe place.

CONCENTRATED CHLORINATING TABLETS

Active ingredient Trichloro-s-triazine trione 100% Available Chlorine 90%

KEEP OUT OF REACH OF CHILDREN DANGER

EMERGENCY TREATMENT: If swallowed, do not induce vomiting. If inhaled, get fresh air. If on skin, wash with soap and water. If in eyes, flush with water for at least 15 minutes. Get medical attention.

Net Weight 2 lbs.

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

3 tablets will provide 1.0 ppm available chlorine in 10,000 gallons of pool water.

These tablets are manufactured for use in erosion type tablet feeders wherein the water flows over the tablets slowly providing a constant chlorine feed rate. Do not throw tablets directly into the pool. Contact with concrete and vinyl walls may cause staining.

In a freshly filled pool, establish an initial chlorine residual of 1.0-1.5 ppm with a granular or liquid chlorinating product. Follow label directions on the product you choose.

Maintain the residual at 1.0-1.5 ppm with 10 tablets per 5000 gallons every 7-14 days in the chlorine feeder. The number of tablets used during this time period may vary depending upon temperature, wind, pool usage, and feeding method. Test the pool frequently with a suitable test kit to assure the chlorine residual remains in the 1.0-1.5 ppm range. The number of tablets and/or the feed rate may be adjusted up or down as determined by your test kit.

Stabilized pools use less chlorinating chemical. If your pool is unstabilized or freshly filled, add stabilizer (cyanuric acid) to the directions on the label.

pH must be maintained between 7.2-7.6. Measure pH frequently and adjust downward with acid, upward with soda ash. See use directions on these products.
