

US ENVIRONMENTAL PROTECTION AGENCY
OFFICE OF PESTICIDES PROGRAMS
REGISTRATION DIVISION (TS-767)
WASHINGTON, DC 20460

EPA REGISTRATION NO.
10598-7

DATE OF ISSUANCE
SEP 6 1995

TERM OF ISSUANCE

NOTICE OF PESTICIDE: REGISTRATION
 PERREGISTRATION
(Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended)

NAME OF PESTICIDE PRODUCT
Pool Doctor Chlorinating
Tablets TST Concentrated 1"
Tablets

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

World Industries International, Inc.
17955 Arenth Avenue
Industry, CA 91748

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

Based on your response to the Reregistration Eligibility Document, EPA has reregistered the above named product subject to the comments recorded in the succeeding paragraph. This action is taken under the authority of section 4(g)(2)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Reregistration under this section does not eliminate the need for continual reassessment of pesticides. EPA may require submission of data at any time to maintain the registration of your product.

Make the following labeling changes before you release the product for shipment:

1. Revise the Precautionary Statements and Statement of Practical Treatment in accordance with Attachment A for Batch 31 products.
2. Under the "Direction for Use", delete the heading "General Classification".
3. Delete "and related Isocyanurates" from the ingredient statement.

A stamped copy of the product label is enclosed for your records.

ATTACHMENT IS APPLICABLE

SIGNATURE OF APPROVING OFFICIAL

DATE

Submit one copy of the final printed labeling before releasing the product in channels of trade with the revised labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

SIDE PANEL

STATEMENT OF PRACTICAL TREATMENT (FIRST AID)

IF SWALLOWED, drink large amounts of water. DO NOT induce vomiting. Avoid alcohol. Call a physician or poison control center immediately.

IF IN EYES: Flush with cold water for at least 15 minutes. Get medical attention.

IF ON-SKIN: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS • Hazard to humans and domestic animals.

DANGER:

Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS:

Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD:

STRONG OXIDIZING AGENT. Mix only with water. Use clean, dry utensils. DO NOT add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of fire, contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

BACK PANEL-1

**DIRECTIONS FOR USE:
GENERAL CLASSIFICATION**

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

For control of bacteria and algae in swimming pools and spas.

3 tablets will provide 1 ppm available chlorine in 10,000 gallons of pool water.

These tablets are manufactured for use in erosion type tablet feeders wherein the water flows over the tablets slowly, providing a constant chlorine feed rate. Do not throw tablets directly into the pool. Contact with concrete and vinyl walls may cause staining.

In a freshly filled pool, establish an initial chlorine residual of 1.0–1.5 ppm with Pool Doctor granual or liquid chlorinating product. Follow label directions on the product you choose.

Maintain the residual at 1.0–1.5 ppm with 10 tablets per 5000 gallons every 7–14 days in the chlorine feeder. The number of tablets used during this time period may vary depending upon temperature, wind, pool usage, and feeding method. Test the pool frequently with a suitable test kit to assure the chlorine residual remains in the 1.0–1.5 ppm range. The number of tablets and/or the feed rate may be adjusted up or down as determined by your test kit. Re-entry into treated swimming pools/spas is prohibited above levels of .3 ppm of chlorine.

Stabilized pools use less chlorinating chemical. If your pool is unstabilized or freshly filled, add stabilizer (cyanuric acid). Follow the directions on the label.

pH must be maintained between 7.2–7.6. Measure pH frequently, and adjust downward with acid, upward with soda ash. See use directions on these products.

STORAGE AND DISPOSAL:

DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL.

STORAGE — Keep product dry in tightly closed container when not in use. Store in a cool dry, well ventilated area away from heat or open flame.

PRODUCT DISPOSAL — Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL — Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or if allowed by the state and local authorities, by burning. If burned, stay out of smoke.
