PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS:

This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS STRONG OXIDIZING AGENT:

Strong Oxidizing Agent. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reuse container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

STORAGE AND DISPOSAL:

Keep product dry in tightly closed container when not in use. Store in a cool dry, well ventilated area away from heat or open flame. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area, or bury in a safe place.

POOL DOCTOR CONCENTRATED POOL CHLORINATING CHEMICAL

ACTIVE INGREDIENT: SODIUM DICHLORO-S-TRIAZINE-TRIONE 100% AVAILABLE CHLORINE: 63%

EPA REG. NO. 10598-S-AA EPA EST. NO. 10598-CA-1

KEEP OUT OF REACH OF CHILDREN DANGER

PRACTICAL TREATMENT (FIRST AID): If swallowed feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately. If on skin. Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in eyes. Flush with cold water for at least 15 minutes. Get medical attention.

SEE ADDITIONAL PRECAUTIONS ON SIDE PANEL

Net Weight 2 lbs.

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

When starting up or freshly filling a pool, superchlorinate to satisfy initial chlorine demand and establish a free chlorine residual between 1.0-2.0ppm. Superchlorinate with 2 oz per 1000 gallons of pool water. The next day stabilize the pool with Cyanuric acid. Follow directions for stabilization on that label. Add daily or as needed at the rate of 1/8 to 1/4 ounce per 1000 gallons of pool water. This is an estimated dosage. Use a reliable test kit and adjust dosage as necessary. Maintain chlorine residual between 1.0-3.0ppm. Maintain pH between 7.2-7.6.

During hot weather and after heavy rains, shock treat the pool. Follow superchlorination instructions in preceding paragraph. Do not permit swimmers in pool until the chlorine residual is 3.0ppm or less. Keep in mind a slightly higher shock treatment schedule must be maintained in the event of heavy swimming load, accumulations of dust dirt, and leaves, which will require more frequent shock treatment.

Features a Dry chlorine which dissolves immediately!

A most effective germicide and algicide!

Will not cause cloudiness in water.

Will not add scale forming minerals in the water!

Will maintain your pool crystal clear!

The control of pH is greatly simplified using Pool Doctor chlorinating compound. In fact, you will require from 1/2 to 1/4 of the acid usually applied. Pool Doctor Chlorinating Chemical provides a more stable form of chlorinating chemical for an easier maintenance of an effective chlorine residual in pool water for disinfecting action. It requires less storage space and remains stable indefinitely. It is economical to use in that once stabilized, you will need use less often.
