US ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (75-767) WASHINGTON, DC 20460 NOTICE OF PESTICIDE: <input type="checkbox"/> REGISTRATION <input checked="" type="checkbox"/> REREGISTRATION <i>(Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended)</i>	EPA REGISTRATION NO. 10598-8	DATE OF ISSUANCE SEP 27 1994
	TERM OF ISSUANCE	
	NAME OF PESTICIDE PRODUCT Pool Doctor High Chlor Stabilized Chlorinating	

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

World Industries International, Inc.
 17955 Arenth Avenue
 Industry, CA 91748

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

Based on your response to the Reregistration Eligibility Document, EPA has reregistered the above named product subject to the comments recorded in the succeeding paragraph. This action is taken under the authority of section 4(g)(2)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Reregistration under this section does not eliminate the need for continual reassessment of pesticides. EPA may require submission of data at any time to maintain the registration of your product.

Make the following labeling changes before you release the product for shipment:

1. Refer to the enclosed Attachment A for the necessary revisions to the Precautionary Statements for the subject product.
2. Delete "General Classification" beneath the "Directions for Use" heading.
3. Include "This pesticide is toxic to fish and aquatic organisms" as the first sentence under Environmental Hazards.

ATTACHMENT IS APPLICABLE

SIGNATURE OF APPROVING OFFICIAL	DATE
---------------------------------	------

A stamped copy of the product label is enclosed for your records.

Submit one copy of the final printed labeling before releasing the product in channels of trade with the revised labeling.

Submit a revised Confidential Statement of Formula. Chemical purity of 97% should be indicated and the lower limit should be revised so that the nominal concentration would fall between the upper and lower limits.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

Attachment A - Batch 26 Products

Labeling:

1. The signal word is "Danger".

2. The Precautionary Statements should read:

"Corrosive: Cause irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or on clothing. Do not breathe dust, vapor or spray mist. Wear goggles, face shield or safety glasses. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse".

3. The Statements of Practical Treatment should read:

"If in eyes: Hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Get medical attention".

"If inhaled: Remove victim to fresh air. If not breathing, give artificial respiration preferably mouth-to-mouth. Get medical attention".

"If on Skin: Wash with plenty of soap and water. Get medical attention if irritation persists".

"If swallowed: Drink promptly large quantities of water. Avoid alcohol. Note to physician: Probable mucosal damage may contraindicate the use of gastric lavage. Get medical attention".

SEE STATEMENT OF PRACTICAL TREATMENT (FIRST AID) AND OTHER PRECAUTIONS ON SIDE PANEL

Net Wt. 10 lbs. (4.54 kg)

ACCEPTED
with COMMENTS
in EPA Letter Dated:

SEP 27 1992

Under the Federal Insecticide,
Fungicide, and Rodenticide Act as
amended by the pesticide
control amendments of 1972, EPA Reg. No.

10598-8

STATEMENT OF PRACTICAL TREATMENT (FIRST AID)

IF SWALLOWED, drink large amounts of water. DO NOT induce vomiting. Avoid alcohol. Call a physician or poison control center immediately.

IF IN EYES: Flush with cold water for at least 15 minutes. Get medical attention.

IF ON SKIN: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS • Hazard to humans and domestic animals.

DANGER:

Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS:

Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD:

STRONG OXIDIZING AGENT. Mix only with water. Use clean, dry utensils. DO NOT add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of fire, contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

60/17

**DIRECTIONS FOR USE:
GENERAL CLASSIFICATION**

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

For control of bacteria and algae in swimming pools and spas.

- 1. Stabilize** pool with Pool Doctor Conditioner (cyanuric acid). * Omit if this has been done previously.
- 2. Check residual chlorine** with a Pool Doctor Test Kit. If below 1 part per million (ppm), add 10 ounces Pool Doctor High Chlor per 10,000 gallons. Repeat this dosage until a chlorine residual of 1.0–1.5 ppm has been established. Add product to water by broadcasting over pool surface, preferably at deep end.
- 3. Maintain residual chlorine.** Add 2–3 ounces per 10,000 gallons every other day or as needed to maintain 1.0–1.5 ppm residual chlorine. (Two ounces of Pool Doctor High Chlor supply 1.0 ppm chlorine to 10,000 gallons.) Higher dosage may be required during exceptionally hot weather or when many people are using the pool.
- 4. Measure pH** immediately and at least once each week with a Pool Doctor Test Kit. Adjust pH to 7.2–7.8 if necessary by adding Pool Doctor Liquid Acid* or Pool Doctor Dry Acid* to reduce pH, or by adding Pool Doctor Soda Ash* to increase pH.
- 5. Re-entry** into treated swimming pools/spas is prohibited above levels of 3 ppm of chlorine.

HOW TO CALCULATE POOL CAPACITY (Gallons of Water)

SHAPE OF POOL	DIMENSIONS IN FEET
Rectangular	Average depth x average length x average width x 7.5
Circular	Diameter x diameter x average depth x 5.9
Oval with straight sides	Full width x full length x average depth x 6.7
Irregular	Consult pool builder

IMPORTANT NOTES:

- 1.** It is good practice to "superchlorinate" each 2–4 weeks. To superchlorinate, add 10 ounces Pool Doctor Super Shocker*/10,000 gallons or 1/2 gallon Liquid Chlorine*/10,000 gallons. Resume regular program when residual chlorine falls to 1.0–1.5 ppm.
- 2.** Pool Doctor High Chlor contains "built in" Conditioner (cyanuric acid). If it is used regularly, no further additions of Pool Doctor Conditioner will be required.

*Follow Directions for Use on labels of these products.

STORAGE AND DISPOSAL:

DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL.

STORAGE — Keep product dry in tightly closed container when not in use. Store in a cool dry, well ventilated area away from heat or open flame.

PRODUCT DISPOSAL — Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL — Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or if allowed by the state and local authorities, by burning. If burned, stay out of smoke.

World Industries International, Inc. warrants that this product is reasonably fit for intended use and that it contains the ingredients on the label in the specified amount. Since use conditions are beyond the control of World Industries International, Inc., our liability is limited to a replacement of the product or refund of the purchase price.

NOTE: This product is sold by weight. Settling of contents during storage and handling will occur.
