ALGAETRET-100

A Microbiostat for use in Industrial Recirculating Cooling Towers to Control the Growth of Algae and Fungal Slimes.

July 16, 1974

UNDER THE FEDERAL INSECTICIDE
FUNGICIDE AND RODENTICIDE ACT
FOR ECONOMIC POISON REGISTER-
ED UNDER NO. 10549-1

ACTIVE INGREDIENTS:

- Sodium Pentachlorophenate
- Sodium Salts of other Chlorophenols

INERT INGREDIENTS

- Weight per gallon
- Weight of active ingredient per gallon

DIRECTIONS FOR USE: Badly fouled systems must be cleaned before treatment is begun. Algaetret-100 should be applied when the system is in jeopardy of becoming fouled or after cleaning systems whose efficiency is already impaired. **INITIAL DOSE:** When the system is noticeably fouled, apply 1/2 to 1 gallon of Algaetret-100 per 1000 gallons of water in the system. Repeat until control is achieved. **SUBSEQUENT DOSE:** When microbial control is evident, add 1/4 to 1/2 gallon of Algaetret-100 per 1000 gallons of water in the system every week or as needed to maintain control. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Stage additions should be made in the sump of the water cooling tower or at a point where it will be uniformly mixed.

CAUTION: KEEP OUT OF THE REACH OF CHILDREN. FOR INDUSTRIAL USE ONLY.

Hazard if swallowed. Avoid contact with skin and eyes. In case of contact, flush with plenty of water for at least 15 minutes. If eye irritation persists, get medical attention. Avoid contamination of food and food storage. This product is toxic to fish and wildlife. Treated effluent should not be discharged where it will drain into streams, ponds, or public water. Apply this product only as specified on this label.
