

[10, 634-13]

DIRECTIONS

(Unspec)

ON ANIMALS: To protect animals from horn flies, house flies, mosquitoes, and gnats, apply a light mist sufficient to wet the tips of the hair. To control stable flies, horse flies, deer flies, apply 2 ounces per adult animal, sufficient to wet the hair but not to soak the hide. Repeat treatment once or twice daily or at intervals necessary to give continued protection.

To control blood-sucking lice, apply the spray lightly to infested areas, using a stiff brush to get the spray to the base of the hair. Use 2 ounces or less per animal. Repeat every two or three weeks as required.

BARN, MILK ROOMS, DAIRY PLANTS: To control flies, mosquitoes, and gnats, apply as a fog or fine mist, directing spray toward the ceiling and upper corners, until the area is filled with mist, using about 2 ounces per 1000 cubic feet of space. For best results, close windows and doors before spraying and keep closed for ten to fifteen minutes. Vacate the area and ventilate before reoccupying. Repeat application as necessary.

CAUTION

KEEP OUT OF REACH OF CHILDREN
See side panel for additional precautions

ALPHA CHEM

READY TO USE ANIMAL SPRAY

A Ready-To-Use **PYRENONE** Insecticide

KILLS AND REPELS

Kills Houseflies, Stable Flies, Horse Flies, Horn Flies, Mosquitoes, Gnats, and Lice.
