FLY-LITE

FLY-LITE INSECTO-LITE CONCENTRATE (EMULSIFIABLE)

Fly Lite Insecto Lite Concentrate (Emulsifiable) is especially compounded for control of the following common crawling and flying insect pests of the food handling, processing and storage industries as well as for the control of flies in poultry houses.

Properly diluted with water and applied, Fly Lite Insecto Lite Concentrate (Emulsifiable) kills on contact the exposed stages of:

- | | | | |
|------------|---------|--------------|--------------|
| Roaches | Spiders | Gnats | Cheese Mites |
| Silverfish | Flies | Musquitoes | Crickets |
| Hornets | Wasps | Flying Moths | |

ACTIVE INGREDIENTS

Pyrethrins	6.00
Piperonyl Butoxide, Technical	60.00
Petroleum Base Oil	6.00

INERT INGREDIENTS

28

*Equivalent to 48.00 of (butylcarbityl) (6-propylpiperonyl) ether and 12.00 of related compounds.

CAUTION KEEP OUT OF REACH OF CHILDREN MAY BE HARMFUL IF SWALLOWED

Diluted with water, Fly Lite Insecto Lite Concentrate (Emulsifiable) is specifically recommended for use in bottling plants, breweries, food processing houses, bakeries, markets, restaurants, stores, hotels, theaters, hospitals, institutions, poultry houses and other situations where effective fast acting insecticide is required. As a space spray, it gives rapid kill of the above mentioned flying and crawling insects contacted by the mist.

Fly Lite Insecto Lite Concentrate (Emulsifiable) can be used around food, food products, utensils and food handling equipment without danger of contamination or poisonous residues, but should not be applied directly to uncovered food or food products. Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment, or thoroughly cleaned before using. When using this product as a space spray in these areas, apply only when plant is not in operation.

DIRECTIONS

AS A CONTACT SPRAY

For best application for an initial clean up with Fly Lite Insecto Lite Concentrate (Emulsifiable), dilute 1 gallon of concentrate with 29 gallons of water and apply in a good machine adjusted to deliver a coarse droplet spray, using approximately 1 gallon of diluted material to each 750 square feet of surface. Against roaches, silverfish, crickets, scorpions, spiders, clover mites and cheese mites with this water diluted concentrate, spray thoroughly all surfaces and areas where these insects are usually found, including walls, baseboards, moldings, floors, cabinets, shelves, sinks and pipes, with special attention to cracks, crevices, niches, dark corners, drains and similar hiding places. Repeat treatment at a dilution of 1 to 59 at the same rate of application after an interval of a month or as needed. Do not apply the 1 to 29 spray mixture as a coarse surface spray in the edible products areas of federally inspected egg, meat and poultry plants.

SPACE SPRAY

For rapid control of flies, moths, wasps, mosquitoes and gnats, dilute 26 ounces of Fly Lite Insecto Lite Concentrate (Emulsifiable) with 39 gallons of water and apply in a good sprayer adjusted to deliver a fine mist. Direct the diluted spray toward the upper portions of the enclosure, filling the room with the mist, and using approximately 2 ounces of diluted material for each 1,000 cubic feet of space. Whenever practicable, keep doors and windows closed for 10 minutes after application. Do not remain in treated areas, and ventilate the area after treatment is completed.

This product is toxic to fish. Keep out of lakes, streams or ponds. Apply this product only as specified on this label.
