

DIRECTIONS

SWIMMING POOL ALGAECIDE

1. In freshly filled pools or pools showing no visible algae growth add one gallon SUNCO Algaecide per 25,000 gallons of water to prevent algae growth.
2. If algae growth is observed, add one gallon SUNCO Algaecide for each 10,000 gallons of water to kill and control those algae species most commonly found in swimming pools. When existing growth is dead, clean the pool, drain and refill if necessary, and add one gallon SUNCO Algaecide per 25,000 gallons of water.
3. If the pool water treated as in (1) or (2) above is recycled, add one gallon of SUNCO Algaecide per 50,000 gallons of water every five to seven days, to maintain between two and five parts per million of active ingredient. See serviceman for test kit.
4. If the pool water treated as in (1) or (2) above is not recycled or not filtered it should be tested periodically to determine the active ingredient content. When necessary, one gallon SUNCO Algaecide per 50,000 gallons of water should be added to maintain two to five parts per million of active ingredient.

USDA Reg. No. 10641-1

NET CONTENTS

SUNCO

SWIMMING POOL ALGAECIDE

ACTIVE INGREDIENTS: Methylenebis(4-chloro-3-hydroxyphenyl) dimethylamine 25
 decylxylene bis(trimethyl ammonium chloride) 20

INERT INGREDIENT Water

Phenol Coefficient:
 Salmonella typhosa — 25
 Staphylococcus aureus — 40

CAUTION

KEEP OUT OF REACH OF CHILDREN. Undiluted SUNCO Swimming Pool Algaecide concentrate may cause skin irritation or damage to the eyes. Harmful if swallowed. Avoid contact with skin and eyes. Do not take internally. In case of contact with skin or eyes, flush immediately with plenty of water. For eyes, flush immediately with plenty of water and get immediate medical attention. Avoid contamination of food.

The presence of algae in outdoor swimming pools is objectionable because of the color, cloudiness, odor, and increased chlorine demand of the water. The use of SUNCO Algaecide will help to maintain the water in a clean condition.

SUNCO Algaecide is compatible with the usual water treatment chemicals. By controlling algae growth with SUNCO Algaecide, the chlorine demand of the pool may be reduced.

CAUTION, KEEP OUT OF REACH OF CHILDREN
