

# SENTRY

## ZAP

ACTIVE INGREDIENTS: ..... 100%

Petroleum distillate  
\*N-octyl bicycloheptene dicarboximide  
\*\*Piperonyl butoxide, technical  
Pyrethrins

\*MGK 264 Insecticide Synergist  
\*\*Consists of 0.120% (butylcarbityl) (6-propylpiperonyl) ether and related compounds of 0.030

### DIRECTIONS FOR USE

**To Kill Flies, Mosquitoes and Gnats:** Close room and discharge spray mist vigorously in all parts of room, using about 2 or 3 ounces for each 1000 cubic feet of space. Leave room closed for at least ten minutes. Sweep up and destroy fallen insects. Repeat as needed. Do not remain in treated areas and ventilate the area after treatment is completed.

**To Kill Fleas (Infesting Premises):** Remove and destroy animal's bedding and spray sleeping quarters freely, forcing the spray into all cracks and about the room. Repeat when reinfested. Do not remain in treated areas and ventilate the area after treatment is completed.

**To Kill Grain Weevils, Cadelles, Grain Moths, Flour Beetles and Grain Mites (Accessible Stages):** Wet surfaces thoroughly and treat all infested surface areas, insect hiding places and insect runways at the rate of 1 gallon of this material on 750 square feet of area, equivalent to spraying to the point of run-off. Repeat when necessary. For flying moths and beetles, treat as for flies, mosquitoes and gnats (see above.) Do not remain in treated areas and ventilate the area after treatment is completed.

**To Kill Roaches and Waterbugs:** Apply in all cracks and crevices in woodwork, underneath sink, dark places behind pipes, and in all places where roaches and waterbugs infest, contacting as many insects as possible. Repeat the operation as often as necessary. Do not remain in treated areas and ventilate the area after treatment is completed.

**To Kill Clothes Moths, Carpet Beetles:** Spray all articles to be protected giving particular attention to folds and seams. Interior surfaces of storage containers such as closets, chests and trunks should be regularly sprayed. The treatment should be repeated every thirty days unless the articles are stored in a mothtight container. Do not remain in treated areas and ventilate the area after treatment is completed.

### CAUTION

#### KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Do not apply directly to food. Cover the food or remove it from the processing equipment during application. Do not apply while food processing is underway. After spraying in meat packing plants, bakeries, and other food processing plants, wash with hot water all equipment, benches, shelving, etc. where exposed food will be handled. If such wash is impractical, do not allow food to come in contact with treated surfaces for at least 48 hours. Remove bird cages and fish bowls during spray application.

Do not store, pour or spill near heat or open flame. Keep container closed.

Do not reuse empty drums. Return to drum reconditioner or destroy by puncturing, crushing and burying in a safe place.
