

JUL 20 1984

CHLOR-TERG 4282

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Danger

Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES permit. For guidance contact your regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS

Strong oxidizing agent. Mix only with water. Use clean utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, generation of hazardous gases and possible generation of fire explosion. In case of contamination or decomposition do not reseal container. If possible isolate container in open air or well-ventilated area. Flood with large volume of water if necessary.

Active Ingredient

Sodium Dichloro-s-Triazinetrione

Dihydrate 28%

Inert Ingredients 72%

Provides 15.8% available chlorine

KEEP OUT OF REACH OF CHILDREN DANGER

Practical Treatment FIRST AID

If swallowed: Feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately. If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists get medical attention. If in eyes: Flush with cold water for at least 15 minutes. Get medical attention.

Midlothian, Ill. 60445

CHLOR-TERG 4282 is recommended for use in either immersion or spray machines to sanitize and clean eggs prior to sale. CHLOR-TERG 4282 is also recommended for use in sanitizing dishes, glasses, food processing equipment and utensils including dairy and brewery equipment and utensils.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

For egg wash: Dissolve one or two ounces of CHLOR-TERG 4282 in ten gallons of warm (125° F) water. This provides 100 ppm of available chlorine. For immersion treatment dip a basket of eggs in the 100 ppm available chlorine solution, hold for two or three minutes, remove and dry. With a conveyor type machine, spray with the 100 ppm available chlorine solution and allow eggs to drain and dry. Eggs should be rinsed with potable water.

For dishes, glasses, food processing equipment and utensils: Dissolve one or two ounces of CHLOR-TERG 4282 per ten gallons of warm (125° F) water. This provides 100 to 200 ppm of available chlorine respectively. Clean and rinse items prior to sanitizing. Then dip the items to be sanitized in solution and hold for two or three minutes. Remove, rinse with potable water and dry. The same solution may be used in the feed tank for immersion or spray-type machines providing two to five minutes contact time for sanitizing dishes, glasses and food processing equipment and utensils. Rinse well with potable water and dry. The items are then ready for use.

The sanitizing solutions should be used promptly after mixing. If the solution is allowed to stand or is reused and tests show the level of chlorine has not been maintained, additional CHLOR-TERG 4282 lizer should be added to maintain a minimum concentration of 100 ppm available chlorine.

STORAGE AND DISPOSAL

Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of a decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area or bury in a safe place.

ATTACHMENT TO EPA REGISTRATION NOTICE

EPA Registration No. 12367-16

Date Issued: July 19, 1984

Company Name: Lico, Inc.

Product Name: Spruce Disinfectant

The following requirements or revisions apply to the label which was accepted with this registration notice:

1. The registration number which has been assigned to this product must appear on the label as EPA Registration No. 12367-16
2. The statement "This disinfectant has not been tested for effectiveness against Mycobacterium tuberculosis and must not be relied upon when tuberculocidal activity is intended" must be added to the label.

Refer to the attached copy of your supplier's accepted prototype label.

In lieu of adding this statement, delete "and other medically related uses" from the label.

3. The labels which will be used for this product in channels of trade must reflect these revisions.
4. Five copies of the finished printed labels, as defined in the A-79 enclosure, must be submitted to the Agency before the product is released for shipment to comply with PR Notice 82-2 of June 18, 1982.
5. The finished printed labels must comply with the general labeling requirements of Section 162.10 of Title 40 of the Code of Federal Regulations. Failure to do so may result in rejection of the labels.
