

DIRECTIONS FOR USE

INITIAL DOSE 1 gallon SHARK SWIMMING POOL ALGAECIDE to 50 000 gallons of water

MAINTENANCE DOSE 1 quart SHARK SWIMMING POOL ALGAECIDE to 50 000 gallons of water

Initial dose is used when filling pool at beginning of swimming season. If pool has visible algae growth treat with initial dose. Vacuum pool after 24 hours to remove algae debris. If visible algae are still present or re-appear repeat this treatment procedure as necessary. When pool is free of visible algae use the recommended maintenance dose.

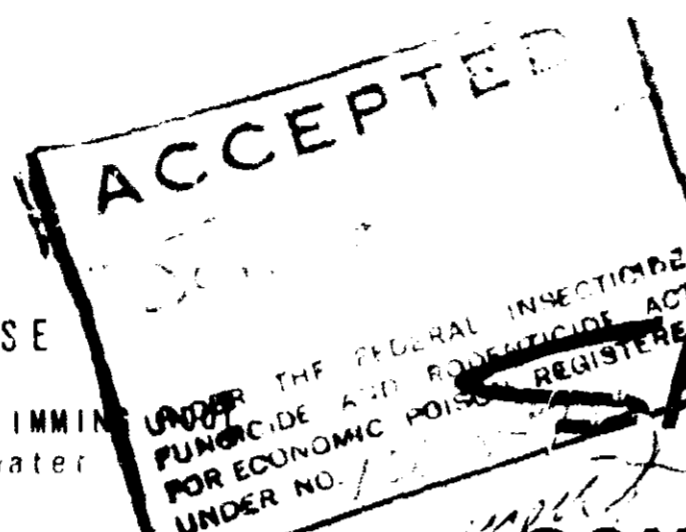

Maintenance dose should be added at 3-5 day intervals. If high temperatures prevail or pool has unusually heavy use, add maintenance dose more frequently.

If make-up water is added at a rate of more than 10% per week of pool capacity, add 1 quart of SHARK SWIMMING POOL ALGAECIDE for each 10 000 gallons of fresh make-up water added per week.

When swimming season is over, add 1 gallon of SHARK SWIMMING POOL ALGAECIDE to 50,000 gallons of water in treating water left in pool. This dose helps provide a measure of control of algae growth during the winter months. This treatment will also help the servicing of the pool before it is returned to use the following season.

FISH AND/OR WILDLIFE PRECAUTION

THIS PRODUCT IS TOXIC TO FISH. TREATED EFFLUENT SHOULD NOT BE DISCHARGED WHERE IT WILL DRAIN INTO LAKES, STREAMS, PONDS, OR PUBLIC WATER.

WARNING

KEEP OUT OF REACH OF CHILDREN. SEE OTHER WARNINGS ON SIDE PANEL.

When SHARK SWIMMING POOL ALGAECIDE is used as directed it will kill and prevent development of *Chlorella pyrenoidosa* (green), *Phormidium inundatum* (black algae), *Phormidium retzii* (Square D algae), *Lyngba versicolor* (blue-green) and other swimming pool algae.

SHARK SWIMMING POOL ALGAECIDE is compatible with most commonly used swimming pool chemicals, but should not be mixed with soap or other cleaners, or premixed with other water-treating chemicals. SHARK SWIMMING POOL ALGAECIDE works best when added by itself directly to pool water. SHARK SWIMMING POOL ALGAECIDE at use dilution is non-corrosive to inanimate surfaces.

WARNING

KEEP OUT OF REACH OF CHILDREN. Do not get in eyes, skin or on clothing. Causes severe eye irritation. Causes skin irritation. In case of contact flush eyes and skin with water for at least 15 minutes, for eyes get medical attention. Harmful if swallowed. Do not contaminate or store near feed or foodstuffs. Wash all contaminated clothing with soap and hot water before reuse.

FIRST AID

If swallowed, drink milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Call a physician immediately.
