# MAGNACIDE™ B MICROBIOCIDAL (Acrolein Inhibited)

## CONTENTS UNDER PRESSURE

For Use in Oil Field Water Injection Recovery Systems

NET WEIGHTS  
Cylinder 370 lbs  
Skid Tank 2450 lbs

ACTIVE INGREDIENT	BY WEIGHT
Acrolein	92%
INERT INGREDIENTS	8%
TOTAL	100%

(MAGNACIDE™ B Microbiocidal contains 6.5 pounds of active ingredient per gallon.)

EPA Est. 10707 CA 5

EPA Reg. No. 10707-10

**DANGER**  **POISON**

KEEP OUT OF REACH OF CHILDREN

Corrosive. May cause eye or skin damage.

### DANGER

EXTREMELY FLAMMABLE AND IRRITATING VAPOR AND LIQUID. POISONOUS BY INHALATION, SKIN CONTACT OR SWALLOWING. DO NOT BREATHE VAPOR. DO NOT GET IN EYES, OR SKIN OR ON CLOTHING. KEEP AWAY FROM FIRE, SPARKS, AND HEATED SURFACES.

Wear face shields or goggles during handling. Use with adequate ventilation. Keep available at all times a gas mask of a type approved by the U. S. Bureau of Mines for organic vapor protection.

Clean application equipment with large amounts of water after using.

If spilled on clothing, gloves or shoes, remove them immediately and wash thoroughly before re-use.

**DANGER:** Acrolein, the active ingredient in MAGNACIDE B is highly reactive chemically and readily forms polymers. If alkalies (such as ammonia and caustic) or strong acids are brought in contact with the MAGNACIDE B in a closed system, the Biocide can polymerize with sufficient violence to rupture the container. Do not apply with equipment used for acids and alkalies. Contamination of MAGNACIDE B with any foreign matter must be avoided.

A supply of 10% sodium bisulfite solution should be readily available for neutralizing spilled MAGNACIDE B. All spills should be confined and neutralized before disposal. (Note: Sodium bisulfite solutions are corrosive to steel and concrete.) Running water should be readily available to wash down the area after neutralization.

Do not reuse empty container. Return empty containers to Magna Corporation.

This product is toxic to fish and wildlife. Keep out of lakes, streams or ponds. Fish, shrimp, and crab will be killed at application rates recommended. Do not apply where they are important resources. Do not apply to water drainage areas where runoff or flooding will contaminate ponds, lakes, streams, tidal marshes, and estuaries. Do not contaminate water by cleaning of equipment, or disposal of wastes. Consult your State Fish and Game Agency before applying this product. Apply this product only as specified on the label.

### ANTIDOTE AND FIRST AID TREATMENT

#### CALL A PHYSICIAN IMMEDIATELY IN ALL CASES OF SUSPECTED POISONING

**INTERNAL:** If the material has been swallowed, induce vomiting immediately. This may be done by introducing a finger into the throat or by giving warm salt water (1 tablespoon of salt to a glass of water). Repeat until vomit fluid is clear. NEVER GIVE ANYTHING BY MOUTH TO AN UNCONSCIOUS PERSON. Keep patient prone and quiet.

If inhaled, get victim into fresh air immediately and give artificial respiration if breathing has stopped.

**EXTERNAL:** If spilled on the skin, remove all contaminated clothing and wash skin with soap and running water. If the material gets into the eyes, wash immediately with running water for at least 15 minutes. For eyes get medical attention.

#### NOTE TO PHYSICIANS

**WARNING SIGNS AND SYMPTOMS:** Liquid MAGNACIDE B is absorbed by the skin and is particularly irritating to any lesion and to the eyes. The vapors act principally on the mucous membrane of the eyes and respiratory tract. Because of the extreme lachrymatory warning effect, the concentration tolerable by man is far below the minimum lethal concentration.

**TREATMENT:** Treat exposed area as a chemical burn. Thoroughly flush the eyes with water and treat symptomatically. Persons exposed to MAGNACIDE B vapors have a delayed reaction and experience irritation of the respiratory tract. In severe cases, this may progress to pulmonary edema. Therefore, it is advisable to keep persons exposed to MAGNACIDE B under observation for 24 hours following exposure.

#### STORAGE OF MAGNACIDE B TANKS

Full tanks of acrolein should be stored in a cool, shady, well-ventilated area which is protected from the weather and away from other chemicals. (No alkalies or oxidizing materials should be near.)

The storage area preferably should be remotely located and should be of fireproof construction. An open shed type structure is suitable. All electrical equipment should be explosion proof and all equipment properly grounded.

#### GENERAL DIRECTIONS

MAGNACIDE B is a water soluble material for the control of bacteria and fungus in oil field water injection recovery systems. This material should only be applied in accordance with directions in Bulletin ACD 65-154 under the supervision of the trained personnel of licensed applicators.
