UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

DEC 07 1993

Mr. Keith Linton
Baker Performance Chemicals, Incorporated
3920 Essex Lane
Houston, TX 77027

Dear Mr. Linton:

Subject: IPC 8955
EPA Registration No. 10707-37
Your Resubmission Dated September 1, 1993

This is in response to your resubmission of the revised labeling for the subject product.

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable subject to the following comment.

1. The "Note to Physician" Statement should follow the "Practical Treatment" Statement.

A stamped copy is enclosed for your records. Submit five copies of the final printed label.

If you have any questions about these comments, please call Marianne Clark at (703) 305-7879.

Sincerely yours,

Ruth Douglas
Product Manager (32)
Antimicrobial Program Branch
Registration Division (7505C)

STATEMENT OF PRACTICAL TREATMENT

- NOTE TO PHYSICIAN:** Probable mucosal damages, do not employ gastric lavage or emesis. Administration of acid or basic substances to neutralize is contraindicated.
- IF SWALLOWED:** Give large quantities of water, do not induce vomiting. Do not drink alcohol. Call a physician immediately.
- IF INHALED:** Remove immediately to fresh air. If not breathing, apply artificial respiration. If breathing is difficult, give oxygen. Call a physician.
- IF ON SKIN:** Brush off chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention.
- IF IN EYES:** Flush eyes with cold water for at least 15 minutes. Get immediate medical attention.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER

CORROSIVE: Causes eye and skin damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewer treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS

Strong oxidizing agent. Mix only with water. Use clean, dry utensils and equipment. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire and explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, hazardous gases and possible fire and explosion.

In case of contamination or decomposition, do not reseal container. Damp or decomposing material may be shock sensitive. Flip container sharply with a pole from a distant, protected position prior to handling. If possible, isolate container in open air or well ventilated area. If necessary, flood with large volumes of water.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

IPC 8955 industrial water biocide is recommended for use in cooling water, industrial water, and air washing systems.

STORAGE AND DISPOSAL

STORAGE: Keep product dry in tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat, open flames, organic chemicals, and sunlight.

PESTICIDE DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest Regional Office for guidance.

CONTAINER DISPOSAL: Do not reuse empty container. Completely empty liner by shaking and tapping sides and bottom to loosen clinging particles. Empty residue into application equipment. Then dispose of liner in a sanitary landfill or by incineration if allowed by state and local authorities. Dispose of drum in the same manner.

INDUSTRIAL RECIRCULATING WATER
COOLING TOWERS

For use only in industrial air washing systems that maintain effective mist eliminating components

For bacterial, fungal, and algal slime control in industrial and recirculating cooling water towers use 1.4 to 2.0 pounds of IPC 8955 per 10,000 gallons of system water (16.8 to 33.6 ppm product which is equivalent to 20 ppm as available chlorine) initially. Repeat as needed to achieve control. Begin treatment when system is in jeopardy of becoming affected or after cleaning systems whose efficiency is already impaired. Treatment should provide at least 1 ppm of available chlorine residual. Test water to insure proper chlorine residual. Badly fouled systems must be precleaned.

Once the desired degree of control has been achieved, apply 5 to 14 pounds IPC 8955 per 10,000 gallons of system water (5.6 to 11.2 ppm product which is equivalent to 5 to 10 ppm as available chlorine) weekly as needed to maintain control.

Feed IPC 8955 directly from the drum to a point in the system where it will be evenly mixed and undisturbed.

CONTAMINATION MAY CAUSE FIRE

MIX ONLY WITH WATER

TRICHLOROISOCYANURIC ACID, DRY OXIDIZER, 5.1, UN 2468, PG II

INDUSTRIAL RECIRCULATING WATER COOLING TOWERS

For use only in industrial air washing systems that maintain effective mist eliminating components

For bacterial, fungal, and algal slime control in industrial and recirculating cooling water towers use 1.4 to 2.8 pounds of IPC 8955 per 10,000 gallons of system water (16.8 to 33.6 ppm product which is equivalent to 15 to 20 ppm as available chlorine) initially. Repeat as needed to achieve control. Begin treatment when the system is in jeopardy of becoming affected or after cleaning systems whose efficiency is already impaired. Treatment should provide at least 1 ppm of available chlorine residual. Test water to insure proper chlorine residual. Badly fouled systems must be precleaned.

Once the desired degree of control has been achieved, apply 5 to 14 pounds IPC 8955 per 10,000 gallons of system water (5.6 to 11.2 ppm product which is equivalent to 5 to 10 ppm as available chlorine) weekly or as needed to maintain control.

Feed IPC 8955 directly from the drum to a point in the system where it will be evenly mixed and uniformly distributed.

CONTAMINATION MAY CAUSE FIRE
