X-CIDE® 105 Industrial Bactericide may be applied in systems used to treat injection water immediately ahead of water deoiling equipment, in the clear water holding tank or at the suction side of the injection pump.

X-CIDE® 105 Industrial Bactericide should be used full strength in concentrations of 15 ppm of **X-CIDE® 105 Industrial Bactericide** on a continuous basis or in slug applications to 2,500 ppm of **X-CIDE® 105 Industrial Bactericide** or higher concentrations as needed (1/8 pint per 1,000 gallons equals approximately 15 ppm). A typical slug application is 1/2 pint per 1,000 gallons.
