**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**X-CIDE® 307 Industrial Bactericide** is recommended for use in those industrial, non-potable waters where a bacterial problem is clearly demonstrated. Examples of **X-CIDE® 307 Industrial Bactericide** applications are as follows: disposal water systems where the effluent does not drain into lakes, streams, ponds, or public water supplies; water injection systems from petrochemical and oilfield operations and cooling water recirculating systems. **X-CIDE® 307 Industrial Bactericide** will control both aerobic and anaerobic type bacteria. **X-CIDE® 307** is very effective in controlling the anaerobic sulfate reducing bacteria that are responsible for producing hydrogen sulfide. Recommended dosage for slug treatments (the preferred treatment method) may be as high as 1000 ppm. Bacterial control may be maintained by use of 50-100 ppm of **X-CIDE® 307 Industrial Bactericide** on a continuous basis (1/2 pint per 1000 gallons equals approximately 60 ppm).
