DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

X-CIDE 307 Industrial Bactericide is recommended for use in those industrial, non-potable waters where a bacterial problem is clearly demonstrated. Examples of **X-CIDE 307 Industrial Bactericide** applications are as follows: disposal water systems where the effluent does not drain into lakes, streams, ponds, or public water supplies; water injection systems from petrochemical and oilfield operations and cooling water recirculating systems. **X-CIDE 307 Industrial Bactericide** will control both aerobic and anaerobic type bacteria. **X-CIDE 307** is very effective in controlling the anaerobic sulfate reducing bacteria that are responsible for producing hydrogen sulfide. Recommended dosage for slug treatments (the preferred treatment method) may be as high as 1000 ppm. Bacterial control may be maintained by use of 50-100 ppm of **X-CIDE 307 Industrial Bactericide** on a continuous basis (1/2 pint per 1000 gallons equals approximately 60 ppm).
